WOMAN'S PROPHECY OF WORLD'S END PUTS 300 IN FRENZY OF PRAYER

DUXBURY, Sept. 23.—Three hundred men and women, members of the Free Christian Society, at their camp five miles from here began at 10 o'clock to-day their final preparation for the end of the world, which, they are convinced, will come to-morrow night. The service, which consisted of prayer, penitence and baptism, was observed with fanatical enthusiasm. It is to be kept up until the crack of doom to-morrow night, or until their delusion vanishes.

Practically all of the 300 adherents of the queer sect have disposed of all their worldly goods in anticipation of the ending of all things. Their homes, furniture, clothing, jewels—everything they possessed, have been disposed of.

The cause of all this frantic preparation was the revelation that came to Ezra Brown of Pawtucket, who declares that the destruction of the world was foretold to her in a dream a year ago.

Believing, as they do, that the top crust of the earth will peel off and that the damned souls will be buried into a caldron of boiling fire, the intensity of their closing services may be imagined.

"And of what use are gold and house and things to me now," cried one woman to-day. "I have given up all. I want no jewels or things of the devil." And the audience cried, "Hallelujah!"

Prayers and songs and exhortations will

MRS. CHASE HIDING FROM PUBLIC GAZE

A mysterious influence, believed to be hypnotic in character, which Mrs. Margaret N. Chase, wife of Dr. H. Lincoln Chase, has over Hartley Dennett, a prominent Boston architect, was assigned to-day by one of Dennett's family as the reason why he has divided his affection between his wife and that of his doctor friend.

This was the explanation of the remarkable soul-mate tangle that has just been brought to light in the Chase and Dennett families, made to-day by Mrs. Vaughn Dennett, the wife of the architect's only brother.

Hartley Dennett's home is at South Framingham, where his wife and two children live. He is at present staying at the home of Dr. Chase on Kenwood road, Brookline. He says he loves Mrs. Chase. Mrs. Chase says she loves him. Dr. Chase says the two love each other in a purely platonic way.

"Hartley Dennett is a loyal, loyable, fine fellow," said Mrs. Vaughn Dennett to-day. "He loves his wife and children as much as he ever did. Mrs. Chas has some mysterious influence over him, an influence that may be hypnotic."

Dr. Chase, when seen at his home, said:

Mrs. Chase in Hiding.

"There has been too much publicity about this already. It is unfortunate and I am grieved that my family has been troubled in this way. The suit was brought against her husband by Mrs. Dennett under a misapprehension. There has been sliding wrong between my wife and Mr. Dennett.

"Mr. Dennett and my wife have been good friends, that is all. So long as there has been nothing wrong between the two there is no reason why he should not remain under my roof if he desires to do so."

"Is the friendship between your wife and

SHIBE PARK, Philadelphia, Sept. 23.—The Mackmen had no hope when they took the field against the Browns to-day that the Scarlets would be able to win from the Tigers in Washington and they figured that either New York or Boston would have to be the teams that would help them win the pennant.

That the Athletics expected to annex this afternoon's contest with the Browns goes without saying. Connie Mack had some good pitchers left and his players didn't care what stab artist the visitors presented against them. The weather was cloudy and there was not a large crowd present.

TO DROP REPORTS.

WASHINGTON, Sept. 23.—Announcement was made at the Government Weather Bureau to-day that after October 5 it will discontinue the publication of weekly reports for the season.

HUNTINGTON AVENUE GROUNDS, Sept. 23.—It was good-by to-day to the Cleveland Club, good fellows all, clean ball players, popular with local fans and a credit to the national game. Again the sun came out after a gloomy morning, and an early afternoon shower, and considering everything, the crowd was of fair proportions.

Deacon McGuire, the present Cleveland manager, hated to get away without a game so he implored his men to get busy to-day and wind-up with a victory. He continued, however, by saying several new players which gave the Red Sox a better chance to make a clean up of the series.

145 ARE CONFIRMED.

Confirmation was administered this afternoon at St. Leo's Church, Dorchester, by the Rt. Rev. Joseph G. Anderson to a class of 145 children. The Bishop was assisted by the pastor of St. Leo's, the Rev. Francis J. Butler, the assistant priests of the parish, the Rev. Fr. Doody of Cambridge and other priests.

GREET BRITISH WARSHIPS FOR HUDSON FETE

NEW YORK, Sept. 23.—There was an outpouring of British patriots to-day to watch the approach of the vanguard of the Englishmen, steam up the bay. Through the morning fog they waited anxiously for the ships to come in, heralded by the roar of saluting guns. The English cruisers Drake, Duke of Edinburgh and Argyll lay outside the harbor and the inflexible, flying the flag of Admiral Sir Robert Seymour, will arrive to-morrow.

At the present time the array of fighting vessels in the Hudson River for the celebration, which opens on Saturday, represents approximately $150,000,000 and probably half a million tons of floating steel. Socially the Hudson-Fulton celebration is already in full swing. The Holland Society gave a banquet at the Waldorf Astoria

Ready everybody in Boston reads the AMERICAN

PEARY'S HOME STATE GREETS ARCTIC HERO

VANCEBORO, Me., Sept. 23.—Commander Robert E. Peary and family reached here to-day at 9:20 o'clock, on their way to the Peary home on Eagle Island. It was the first stop on United States soil. The Pole finder was greeted at the station by a crowd of enthusiastic citizens who cheered wildly as he came out on the platform and doffed his hat.

At St. John, where the train stopped for half an hour, from 6:15 to 6:45, Commander Peary was met by a group of school children and local newspaper men. He said that he still wished to remain silent concerning Cook's claims, adding:

"I expect to have something to say soon. I would be glad if this controversy might be settled once and for all by a competent tribunal."

Elaborate preparations were made today to welcome Commander Peary at

TOM LAWSON'S NIECE ELOPES IN AN AUTO

Miss Gertrude C. Lawson, niece of Thomas W. Lawson, ran away in an automobile with Walter L. Shepard, a wealthy young man, who lives across the street from the Lawsons in Melrose Highlands, and the two were married. The news of the elopement became known today.

Miss Lawson is twenty-two years old, and one of the prettiest girls in Melrose Highlands. Her father is John H. Lawson, brother of Thomas W. Lawson, the financier. The Lawsons live at No. 962 Franklin street, Melrose Highlands.

The young people went out riding in Shepard's touring car yesterday afternoon and went to the home of their friend, the Rev. B. F. Leavitt of the First Congregational Church, Arlington, formerly of the Melrose Highlands Congregational Church. He married the young people in his library. Then they came back home and told their astonished relatives that they had been married, and took the train to go away on their honeymoon.

DOVES SAY GOODBY TO THE PIRATES

BATTING ORDER.

Evans, p.	Willis, p.

FORBES FIELD, Pittsburg, Sept. 23.—The Doves made their last appearance of the year on these grounds this afternoon. The Pirates wished they could remain until the end of the season, but schedules must be followed in baseball.

From here the tailenders go to Chicago, then to St. Louis and then to Cincinnati. They have played fairly good ball during their stay here, but appear to realize they are no match for the Pirates, who are best on winning the pennant.

THE WEATHER.

Showers this afternoon and to-night. Friday, fair and cooler. Light southerly to westerly winds.

Sun rises 5:34 a. m.; sets 5:40 p. m.
Moon sets 11:09 p. m.

AMERICAN LEAGUE GROUNDS, Washington, Sept. 23.—It was the last game of the year between the Senators and Tigers and the last easy snap for Jennings's men this season. Tomorrow they will tackle the Highlanders in New York, after which they go to Boston, and it is not expected they will have the easy picking they have had here.

Manager Cantillon didn't care whether school kept or not. It has just been decided to make McAleer manager for next year and the Washington players are disposed to take the remaining games as a joke.

BYERS IS RECAPTURED.

PORTSMOUTH, N. H., Sept. 23.—Willis Byers, who, in company with John Hu escaped from the Rockingham County yesterday afternoon was captured last by Sheriff Spinney and Deputy Sheriff Shaw at Conway Junction. Riley was captured earlier in the day near Eliot.

A SUNDAY AMERICAN want often the road to fortune.

PEARY IS WELCOMED BACK TO THE STATES

Continued from First Page.

Bangor, John F. Woodman, the Mayor, who first issued the call designed the engineer to stop there at a reception prepared for him by Bangor's most prominent citizens. A loving cup is to be presented, and speeches made. Arrangements were accordingly made by Commander Peary to remain in Bangor from 1:15 to 3:40. He expects to reach Portland by 7:40 p. m. From Portland the Peary family will go to Eagle Island, Casco Bay, Friday morning in a motor boat.

Commander Peary was greeted enthusiastically at St. John, despite the early hour. The reception was the warmest of any received by the Pole finder since his departure from Sydney. With the United States boundary growing nearer and nearer as Peary's train advanced this morning, the wayside reception to Peary seemed to grow warmer and warmer. There were not lacking at the stations signs that Peary was at last drawing near his own country. American flags were more plentiful for one thing. They were waved from windows, from carriages and from the hands of boys and girls at every platform. The children are the most enthusiastic of Peary's admirers.

"That's Peary, who found the North Pole, and he is the greatest man in the world. Hurray!" shouted one glory-struck youngster at a station, when Peary, called out by the cheers of the school children, poked his big, impressive head out of the car door and waved his soft hat. Peary's features drew up in the peculiar, slow-spreading smile that gains the uppermost over his usually stern features at times. His daughter Marie laughed outright, and insisted that her father was blushing over the juvenile compliment.

Child Touches His Foot.

At another station where Peary came to the front on the car steps to bow and lift his hat a tiny girl reached up and touched his shoe with her hand, as if she wanted to see if he were real. She was not much over six, but she happened to be standing close to the Pullman step, just where she could reach his foot. She touched first his heel as he turned back to re-enter the car. A moment later she pulled her hand back, looking scared, but Peary never felt the light touch or knew of it till his friends told him after the train started.

GRAND RECEPTION TO THE STATES BY CITY OF BANGOR

BANGOR, Me., Sept. 23.—With the church bells chiming a welcome to the United States, the American flag floating proudly in the breeze from every flagpole in the city, and the Bangor Brass Band blaring out "Columbia the Gem of the Ocean," Commander Peary will make a triumphal entry into Bangor at 1:15.

The explorer is received by Mayor Woodman and the members of the Common Council and the City Council, who will escort Mr. Peary from the railroad station to the Bangor House. The procession is headed by the police, then the band and then the welcoming committees and delegations in carriages with the Mayor and the explorer in the last vehicle.

Loving Cup from Citizens.

At the hotel a grand reception will be tendered by the citizens to Commander Peary, and Mayor Woodman will present him with a massive silver loving cup, which bears the following inscription:

"To Commander Robert E. Peary, U. S. N., in recognition of his remarkable achievement in paving the flag of the United States at the North Pole, April 6, 1909. Presented September 23, 1909, by the city of Bangor, Maine."

President Hyde of Bowdoin College, Peary's Alma Mater, was invited to participate in the welcome, but owing to his duties he could not be present. He wrote the following letter or regret:

Hon. John Woodman, Mayor of Bangor:

Dear Sir—Please accept my hearty thanks for the honor of your invitation to meet Commander Peary on Thursday. Nothing would give me greater pleasure than to unite with you and the citizens of Bangor in honoring one of our most illustrious sons. But Thursday is the day college opens and the duties connected with the opening of college will compel me to remain in Brunswick. Sincerely yours,

(Signed) WILLIAM DEW. HYDE.

Banquet at Portland.

Commander Peary and his party leave Bangor at 3:40 for Portland, where to-night the explorer will be the guest at a citizens' banquet at the Falmouth Hotel.

It is hoped that in the address Commander Peary will give from the porch of the Bangor House he will give the first extended verbal account of his trip.

The loving cup to be presented to him is simple but massive in design.

While the citizens' reception is being tendered to Mr. Peary in the spacious parlors of the Bangor House, Mrs. Woodman, wife of the Mayor of Bangor, will give a dinner at the Woodman residence on Pine street in honor of Mrs. Peary, her son and daughter. This is private, and Mrs. Woodman is to act as hostess.

COOK "MADE GOOD," GENERAL VERDICT OF NEWSPAPER MEN

NEW YORK, Sept. 23.—The first of the inevitable series of banquets which all men who do things must face will be given by the Arctic Club of America in honor of Dr. Frederick A. Cook this evening at the Waldorf Astoria. At this meeting will be extended America's formal greeting to the returned hero.

Twelve hundred guests will attend. Rear Admiral W. S. Schley, president of the club, who rescued the members of the Greely expedition, will preside. Borough President Bird S. Coler will represent Brooklyn. Count von Moltke will speak for Denmark. Professor W. S. Brewer will tell what the discovery of the Pole means to science. Job E. Hedges will make a few observations subject to meteoric variations. W. S. Bennett, a member of the House of Representatives, will speak on behalf of the residents of Delaware Valley and Callicoon, where Dr. Cook was born.

The speeches of all save Dr. Cook are not expected to exceed five minutes. The explorer has been urged to take all the time he wants.

Dr. Cook was to-day presented with an engrossed copy of the resolution of the Board of Aldermen granting him the freedom of the city and was highly pleased at the unusual honor conferred upon him.

While there is no precedent to follow, the unusual privilege will be set for an indefinite time, probably a week or ten days, during which there will be a series of events held in recognition of Dr. Cook's Polar feat. A public reception will be held in City Hall for Dr. Cook, probably on Octo-

The general verdict of the cross-examining squad of newspapermen who quizzed Dr. Cook is that he has made good.

ALL EUROPE THINKS COOK FIRST AT POLE, SAYS DR. TRUEBLOOD

"It was on the strength of his story, told in a simple, straightforward manner and bearing every evidence of reality that all Europe greeted Dr. Cook as the first conqueror of the polar zone."

This statement was made to-day by the Rev. Benjamin F. Trueblood, secretary of the American Peace Society, who had the honor of meeting the explorer at Copenhagen, attending his lecture there, and afterward being detailed to introduce the hero to the passengers on board the Oscar II.

SCHOOL days are the days when most of the important habits of life are formed. Teach your children the daily use of

Dr. Lyon's PERFECT Tooth Powder

and they will some day rise to call you blessed. It cleanses, beautifies and preserves the teeth and imparts purity and fragrance to the breath.

4 IDENTIFY LOST HEIR IN $500,000 SUIT

Two of the boyhood friends of Daniel Blake Russell positively identified Alvin in the Cambridge Probate Court today as the son of Daniel Russell of Melrose, who left his brother William $500,000, with the promise that should Daniel be found after years of wandering, half the fortune should go to him.

The first to identify him was Walter B. Thayer, Jr., of Whitinsville, formerly of Melrose, who testified that he went to school with him. "I am positive he is the same Daniel Russell," said Mr. Thayer, when the claimant arose in court.

Mrs. George E. Cowdrie of Waltham, whose maiden name was Adelaide Preutz, testified as follows:

"My brother, Edward, and Daniel Blake Russell were very intimate chums. I often rambled through the woods with them up to the Fall of 1884. I go in the Fall of 1884 I met Daniel Blake Russell every night at a certain time for a period of four years. It was the custom of all the young people to go to the post office for the evening mail.

"Dan Was Bashful."

"Dan was so bashful that he wouldn't go when the others were there. I met him every night at Vogle's Crossing. I would be on my way from the mail and he would be going to get the mail."

The claimant then arose in court, his attorney asking the following question:

"Mrs. Cowdrie, I will now ask you to look at the man now standing in court and state whether or not he is the identical person that you knew in childhood as Dan Jel Blake Russell?"

With a firm voice she replied: "He is the same man."

She was then cross-examined by Attorney Proctor.

The witness then stated that she met Mr. Russell at the Hotel Commonwealth in Boston on July 5 last, after an appointment over the telephone.

Knew Voice on 'Phone.

Q.—I suppose you made up your mind at the Commonwealth Hotel that he was the same person? A.—Yes.

Q.—How soon? A.—About three seconds after seeing him.

Q.—Before talking with him? A.—Yes, without a word being spoken by either of us.

Q.—And although you and not seen him for twenty-four years you knew him instantly? A.—Yes.

Q.—Had you made up your mind that he was Daniel Blake Russell before you saw him at all? A.—Yes, sir.

Q.—Over the telephone? A.—Yes, sir. I knew it was he when I called him up on July 8. I knew his voice and he hesitated in talking as he always had. I also knew it was he by the way he talked of my father and the fact that he got my name correctly, although it is an odd one. When I called him up I first asked him as a test if he remembered who the carpenters were who made certain alterations on his father's house many years ago. He gave the names of four carpenters. My father was one of them. The names he gave were correct.

Robert N. Twist, who says he "hobnobbed" with Russell further identified him.

Alonzo Lowell of Derwood, N. Y., who was deputy sheriff in that town from 1881 until 1895, also positively identified Russell in court as the man whom he knew twenty years ago as Daniel Blake. Lawyer Leslie A. Simpson requested Mr. Russell to stand in the courtroom. Then turning to the witness he asked: Q.—Have you ever seen this man before? A.—Yes, sir.

Q.—When and where for the first time did you see him? A.—In Malone, N. Y., about '87, '88 or '89.

Q.—What was his name then? A.—He went by the name of Daniel Blake. Sometimes I saw him every day.

Saw Russell at Malone.

Q.—Do you know where he came from? A.—I think I know that he came from the East.

Q.—When did you see him last before seeing him in court? A.—I saw him on July 10, 1894, in Malone.

Q.—Is the man you knew in those years as Daniel Blake the same man who stands in the court room? A.—Yes, there is no doubt about it.

Lawyer Simpson declared in the proceedings that the East claimant's case will rest until he is being heard, that Pendleton and other of the heirs had died of consumption, had employed detectives to shadow him and some of them had witnesses.

"Not alone was I followed by detectives," said Mr. Simpson, "but men were sent to New York for me to endeavor to get our witnesses to come here to testify at this trial."

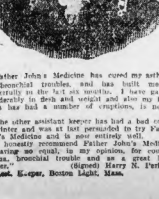
SEEK AGED MAN ON WALK TO NEBRASKA

Declaring he would walk to Nebraska to the home of his daughter, John C. Sullivan, aged seventy, left his home on Bellevue street, Worcester, Sept. 10 last, after a family disagreement, and has not been heard of since. His family of two sons and a daughter are alarmed over his absence, and today called for the aid of the police to trace the wanderer. Mr. Sullivan left no money with his home. He is 5 feet 7 inches in height, weighs 170 pounds, is of light complexion, quite bald and wears a full beard and mustache of brownish gray.

ADMIRAL CLARK IS SERIOUSLY ILL

FREMONT, O., Sept. 23.—Rear Admiral Charles E. Clark, U. S. N., is seriously ill at the home of Colonel Webb C. Hayes. Admiral Clark came to Fremont for the purpose of making a visit to Colonel Hayes shortly after his arrival he was seized with a severe attack of bowel trouble. He is now confined to bed under the care of a physician.

AT BOSTON LIGHTHOUSE



"Father John's Medicine has cured my asthma, my bronchial troubles, even my hair has come to wonderfully in the last six months. I have gained considerably in flesh and weight and also my face, which has had a number of eruptions, is nearly clear.

"The other assistant keeper has had a bad cough all winter and was at last persuaded to try Father John's Medicine and is now entirely well.

"I honestly recommend Father John's Medicine as having no equal, in my opinion, for coughs, asthma, bronchial trouble and as a great body builder." (Signed) Harry N. Perkins, 2d Asst. Keeper, Boston Light, Mass.

Schoolmate Sweetheart Says Daniel Russell is Long Lost Heir

Miss Hattie Keith of Melrose, who identifies former sweetheart as heir to Russell riches.

GIVE SCHOLARSHIP FOR YANKEE GIRL

A scholarship of $1,500 at either Oxford, Cambridge, or London Universities for the County Board of the Ancient Order of Hibernians will be held in Hibernian Hall, Haverhill, for the purpose of establishing a fund for the education committee of that organization.

HIBERNIAN COUNTY BOARD TO MEET

This quarterly convention of the Suffolk County Board of the Ancient Order of Hibernians will be held in Hibernian Hall, Haverhill, for the purpose of establishing a fund for the education committee of that organization. Plans will be discussed relative to the formation of new divisions in the same city the Middlesex County Board will hold a session in Hibernian Hall, Somerville.

KEPT WEDDING A SECRET 8 DAYS

WAKEFIELD, Sept. 23.—After keeping the fact a secret for eight days, Miss Nellie M. Keener, daughter of Mr. and Mrs. Henry Keener of Melrose street, this town, surprised both her parents and friends by announcing that she had been quietly married to Frederick Hitchcock of Newton.

THIEVES AS GUESTS GET $10,000 LOOT

NOLA, Sept. 23.—Thieves, masking under the guise of guests, entered the castle home of the Prince of Scaglia, making away with jewels and money to the value of $10,000.

Backache Cured Beauty Restored

When the liver becomes congested and sluggish, biliousness, coated tongue, dull look in the eyes, and sallow skin follow. Backache, headache and a tired out feeling add to the sufferer's troubles. Warner's Safe Cure cures Kidney, Bladder, Liver Troubles and Rheumatism.

MRS. EMMA ARNOLD.

Mrs. Emma Arnold of Kersey, Col., writes that her liver was out of order, and this caused backache, headache and a tired-out feeling, and after trying many other remedies, without good results, took Warner's Safe Cure. Inside of two months she was a "well woman."

"I hesitated a long time about using Warner's Safe Cure for liver trouble from which I suffered. I did not really have much faith in it, as I had tried so many other medicines without good results, but I am pleased to state that it proved to be better than all the rest. In two months after I began using Warner's Safe Cure I was a well woman, no longer suffering with backache, headache and feel so out of sorts and depressed." Mrs. Emma Arnold, Kersey, Col.

ANALYSIS FREE

If you have any doubt as to the development of the disease in your system, send a sample of your urine, putting your name and address on package, to our Medical Department, and we will analyze it and send you a report, with advice and medical booklet, free.

When the kidneys are diseased the uric acid is not carried off, and this causes Rheumatism, Backache, Gout and Bright's Disease. Warner's Safe Cure drives out the uric acid and prevents and cures all forms of kidney disease.

Warner's Safe Cure is made from the fresh juices of plants and medicinal roots, gathered at the proper season in various quarters of the globe. Men skilled in botany and chemistry compound it. It is pleasant to the taste and agreeable to the most sensitive stomach. For sale everywhere. Two sizes, 50c. and $1.00 a bottle.

Constipation, Biliousness and Indigestion

WARNER'S SAFE PILLS, purely vegetable, sugar-coated, absolutely free from injurious substances, a perfect laxative, will cure Indigestion, Biliousness, Torpid Liver and Constipation. They do not gripe or leave any bad after-effects. 25c. a box.

Trial Bottle and Box of Pills Free To convince every sufferer from disease of the kidneys, liver, bladder and blood that WARNER'S SAFE CURE will absolutely cure, a trial bottle and a box of pills will be sent FREE OF CHARGE, postpaid, to any one who will write WARNER'S SAFE CURE CO., Rochester, N. Y., and mention having seen this liberal offer in the Boston American.

NEW ENGLAND'S GREAT CASH HOUSE

Our Friday Three-Hour Sales

EXPLORATION SIMPLIFIED. Explorers and their discoveries seem just now to be essentially monopolizing the attention of the public. Every successful exploration is an attainment in the interest of science, and we submit to our readers an exploring proposition which (simple as it is) we think will prove no exception. Our proposition will require no polar outfit and no exertion more strenuous than to sit in your chair and let your eyes explore carefully every particular inch of this bulletin. The exploration will be successful and the results will appear plainly if you give due attention to the science of household economy.

Our Lunch Room

It you lunch in our restaurant (ninth floor) you will enjoy a restful, satisfactory luncheon, and save time for shopping. Good cooking, good service, good music—everything good.

Deposit Accounts

Avail yourselves of the conveniences of our Deposit Account System. Start an account and have your purchase charged; thereby saving much time when shopping. Inquire at desk, first floor, rear.

"HUSBAND SHOULD HAVE RIGHT TO SHOW WOMEN AFFECTION"

"Wife Has No Monopoly of Love; It Is Boundless," Declares Brookline Physician.

Continued from First Page.

Mr. Dennett purses platonic," asked the reporter squarely.

"That word, 'platonic,' replied the doctor, 'has begun to be regarded with suspicion. I will answer in this way: The friendship between Mr. Dennett and my wife is just the same as the friendship between Mr. Dennett and me."

Mrs. Chase left her home in Brookline to-day to visit a friend. She desired that her whereabouts be not known. It also does not like the notoriety that has come to her through the remarkable case.

"Would Love All Women."

Dennett declares that although he loves Mrs. Chase the more that she does not woo he loves his wife the less. "My ideals of love," he says, "would allow me to love all women although married to one."

The remarkable complication of affairs as being in the relations between Mr. Dennett and Dr. and Mrs. Chase was brought to light as a result of Mr. Dennett's suit for the custody of his two boys, heard before Judge Chamberlain in the East Cambridge Probate Court. Mrs. Dennett charged her husband loved Mrs. Chase and that she had discussed the situation with "barbaric frankness" with Mrs. Chase.

On the witness stand Dennett admitted he loved Mrs. Chase. He said:

"Between Mr. Dennett and myself for the past few years there has developed the conviction on both sides that our ideas and convictions were very different. I find that I cannot adapt myself to my wife's way of thinking, and I have been compelled to form the conclusion that she has felt the same way in regard to me.

"Notwithstanding the fact that I love Mrs. Chase the more, I can't say that I love my wife the less. My ideals of love would allow me to love all women, although married to one.

"I made a proposition to my wife some time ago that she allow me to take one child and that she should take the other. I am certain that we could love each other just the same under such conditions."

Judge Chamberlain interrupted Dennett in his talk to state that his decision of which I was aware. Mrs. Dennett was not justified. The judge stated that he would decide that the child should be given into the custody of its mother and announced that later on when on the principles that bind together he would set a figure regarding the amount of money to be given Mrs. Dennett for the support of her children.

"No Monopoly On Love."

Dr. Chase defended his wife. Mr. Dennett, he declared, "could monopolize the platonic love of her husband simply because she has married to him. On the point Dr. Chase said: "By marrying one does not gain a monopoly of love, whether the specific case concerns husband or wife."

Here is the way Dr. Chase explained the situation:

"My wife and Mr. Dennett may have been unconventional, but as wife can assure would go to jail rather than pay a fine where principle was involved.

Mrs. Dennett Wrote Mrs. Chase.

"Perhaps some person would look upon them as Socialists.

"It was about five years ago that I first met Mr. Dennett. He was the architect who designed my home. In the course of the work my wife and I frequently had occasion to consult him. Gradually our acquaintance ripened into friendship.

"We became acquainted with his wife, and our families were as one. The Dennett children called me Uncle Lincoln and he was Uncle Hartley to my little ones.

"For three years everything was harmonious. Then Mrs. Dennett was led to a misunderstanding of my wife's motives for friends.

"She wrote to my wife, stating that she did not wish her to call at the Dennett home or to receive Mr. Dennett as a guest.

"But what could we do? We both thought the world of Mr. Dennett and could no more refuse his friendship.

Fullest Trust in Wife.

"Mrs. Dennett's mistake is in thinking that she has a monopoly of her husband's love because she is married to him. Such a belief is wrong. My wife has fought to show affection for other women. By love I mean a pure platonic friendship.

"I have been married twelve years and place the utmost trust in my wife.

"Mr. Dennett doesn't believe that love can be measured by a ton coal measure. Love is boundless. I can assure you that Mr. Dennett's love for Mrs. Chase is as pure as the driven snow."

Dr. Chase is the agent of the Brookline Board of Health. He is also in charge of the Contagious Hospital and is an expert in the fight against tuberculosis. Dr. Chase's wife was formerly Miss Margaret N. Everard and graduated from Wellesley College.

She is about thirty-five years old and a brunette. After coming to Brookline she became a member of the Dennett household and remained her period of service there ten years ago, when she married Dr. Chase. The couple are said to have lived very happily, and their home on Kennard road has been the gathering place of society at frequent intervals.

Mrs. Dennett, wife of the architect, who brought the petition, has been very prominent in civic life many years, and has a host of friends. She has long been recognized as one of the most ardent of the militant suffragists and has been a member of the "flying wedge" band that toured Massachusetts recently.

Her maiden name was Mary Ware, and she is a graduate of the Boston Art Museum school. After graduation she taught at Drexel Institute, Philadelphia, and later went to Europe, where she became greatly interested in art study.

After returning to Boston she rented an old cliff-on Peterboro Court and made a specialty of work on Cordovan leather. Her marriage to Mr. Dennett followed, and two boys have been the result of the union.

Mrs. Hartley Dennett.

NO MONOPOLY ON LOVE, SAY DENNETT AND CHASE

"Notwithstanding the fact that I love Mrs. Chase the more, I can't say that I love my wife the less. My ideals of love would allow me to love all women, although married to one."—*Hartley Dennett.*

"By marrying one does not gain a monopoly of love, whether the specific case concerns husband or wife. This love between Mrs. Chase and Mr. Dennett is pure. All the great teachers, Jesus, Emerson, taught that love is boundless. Mr. Dennett should have the right to show affection for women other than his wife."—*Dr. H. Lincoln Chase.*

"Mrs. Chase Kissed Dennett in Public, but I Knew About It," Says Dr. Chase.

SHAW PAYS WIFE $1,000

By an agreement reached today by attorneys representing Senator James F. Shaw and his wife, Mrs. Nellie E. Shaw, whose matrimonial troubles caused ocean-to-ocean talk a few months ago because of the presence of Mrs. Shaw's chauffeur, H. Reno Marble, with her in Los Angeles and the subsequent battle for their son, the husband has given the wife $1,000 on account for alimony, pending the outcome of the divorce suit brought by him.

The motion for counsel fees, which was brought before Judge Fessenden in the Superior Court on September 13, at which time a private hearing of the case was denied, was continued until to-day. No court proceedings were held to-day, as a conference of the lawyers had been held quietly.

Mrs. Shaw at first asked for $5,500 counsel fees and expenses to defend the libel for the divorce that her husband filed against her, but Judge Fessenden suggested $2,500. To-day $1,000 was paid on account, and another airing of the case was avoided.

"STRANGEST BIRDS AND BEASTS—Every one interested in nature and the "Zoo," that magnificent collection will be delighted with this article in the SUNDAY AMERICAN.

NORTHCLIFFE PREDICTS WAR

SAN FRANCISCO, Cal., Sept. 23.—Lord Northcliffe, English publisher, and Moberly Bell, editor of the London Times, during their visit here, both expressed the belief that there will be trouble between Great Britain and Germany is certain to come.

"The facts are plain," Lord Northcliffe said. "We know that Germany has declared to discuss her vast armaments. We know that all of her diplomatic yards are engaged in naval constructions that mean that they are working day and night, and that scores of her leading statesmen and writers make no secret of her intentions.

"We know that she has on previous occasions made unprovoked attacks on other nations and we know that she reveals she is building are designed either for commerce-destroying purposes or for use close to home waters.

"We have the German Emperor's declaration that Germany's future is on the water. We have the fact that the population of Germany must have an outlet and her industries new markets, and that the most likely field is in places where the British flag floats. I fear that any opinion to foolish."

DENY REPORTS OF MASSACRE

LONDON, Sept. 23.—No confirmation has yet been received of the London Express story of the massacre of Jews at Kiev, Russia. Nothing in correspondence has been received in Berlin, where the disorders was also published, and the Jewish societies there are inclined to doubt the report.

Dr. Kahn, who represents the societies there during the absence of the chief minister, Dr. P. Nathon, said that this supplemental report had its entire foundation in the apprehension among the Jews of one of the suburbs of Kiev that they might be attacked, in consequence of a quarrel between themselves and some rough local characters.

Dr. Kahn said that in this instance he was happy to declare that not a Jew had been hurt or a property worth of property destroyed. He disavowed emphatically the suggestion that the reports on this matter interposed at the instance of Jews at Kiev, and noted with the Jewish societies of Berlin.

VIGIL IS STILL KEPT BY DOVE

The interest created in East Boston by the white dove which has slightly visited the Methodist Episcopal Church, Bremen, which Rev. L. B. Bates was pastor, since his death three weeks ago, is still keen and to-day night interested spectators, both celebrity and other parts of the city journeyed to stand to watch its advent and to stand conjecturing as to what its presence means.

Many believe that it is a miracle and others talk transmigration of souls, and some other ideas to explain the unusual spectacle. Just at dusk, the little white bird flutters down from above and assumes a perch above the front door of the edifice. All night long the little messenger keeps his vigil and at daylight flies whence he came, no one knows where.

Rev. Mr. Bates was strongly fond of white and his preference was carried out in the matter of having white robes, white horses and white hearse at his funeral.

TRUTH ABOUT THE NOTABLE MARLBOROUGH SEPARATION—Why domestic tragedy will be related in detail in SUNDAY AMERICAN.

MISS GOULD HELPS MARQUIS WIN BET

LONDON, Sept. 23.—Marjorie Gould, daughter of Mr. and Mrs. George Gould, is the subject of much favorable comment in London and on the Continent. Her pretty nature is for special attraction. The young Marquis of Stafford is one of her numerous admirers. A young London officer a little while ago happened to say in the presence of Lord Stafford that Miss Gould's hair was not all her own. The latter bet him a few coppers for the fair American and said he would wager $500 that every thread of it grew on her own pretty head. Both men were friends of the Goulds. The German plucked up courage to tell the girl the bet that had been laid between him and Lord Stafford. Much amused, Miss Gould, untied her tresses in the presence of her parents and several others in order that Lord Stafford might win his wager.

100 PERISH; 700 HOMELESS IN FLOOD

CONSTANTINOPLE, Sept. 23.—One hundred persons are dead and 500 houses have been washed away in disastrous floods in northern Syria, according to information brought here to-day. Seven hundred are homeless and all starve unless succor is immediately sent.

IRISH STEW! SEND IN YOUR RECIPE AND WIN A PRIZE!

Do you know how to make an Irish stew?

Not those concoctions served in many restaurants under the name of beef stew or lamb stew, but the real, old-fashioned delectable, invigorating Irish dish.

Two AMERICAN readers are going to receive $5 each for the best recipes.

Here's the reason:

The AMERICAN received the following letter yesterday:

Mr. O'Reilly's Cry For Help.

Editor AMERICAN:

Help me, please. What is an Irish stew? I've been living in Boston a few months and one of my favorite dishes is Irish stew. But I cannot get a real Irish stew in this town. Why?

In some restaurants the Irish stew is made up of leftover roast beef and potatoes, with a watery gravy, which is a far cry from the genuine stew is composed of bona pieces of lamb, onions and potatoes, and in other places a few onions are added and often some green peppers.

But none of these are the Irish stew I am talking about, which I was a lad in Donegal.

Will some of the AMERICAN readers or the chefs of our hotels please help me by sending me a recipe for the real article? An Irish stew properly made is one of the best dishes on the board.

I will say as for the best recipe.

LAWRENCE O'REILLY.

Desiring to help Mr. O'Reilly, the AMERICAN has offered an additional $5 for the second best recipe.

Come on, everybody. Let us know just what a real Irish stew is. It sounds good.

Everybody ought to help O'Reilly.

For the sympathy of his hunger.

Good luck to O'Reilly

Who is not doing well.

Address letters, LAWRENCE O'REILLY, The AMERICAN, Boston.

Here They Come.

And here the recipes begin to pour in.

WELL, LISTEN TO THIS!

Editor AMERICAN:

Lawrence O'Reilly, formerly of Donegal, wants to know about making an Irish stew. Well in the first place, and the best Irish stew I ever ate was in a little cafe managed by an Frenchman, on 2nd Boulevard des Italiens, in Paris. A French cook can make a real Irish stew.

HUGH O'TOOLE.

GUESS AGAIN.

Editor AMERICAN:

I always thought a stew was a fellow who drank too much booze.

W. G. H.

RECIPE FROM THE PHILIPPINES.

Editor AMERICAN:

When I was in the army as cook in the Philippines I used to take all the leftovers we called it Irish stew. Then we add and cook, you can get into an Irish stew like berley. CHELSEA ROOTER.

(Better for whom? No real Irish stew was ever made of scraps.)

"SWEET DREAMS TO O'REILLY."

Editor BOSTON AMERICAN:

Here's the kind my mother used to make: Two pounds lean salt pork, with a little fat, cut in pieces; put in a kettle in cold water, let come to a boil, drain off water; add 2 pints boiling water, with a few minutes, add 4 onions, 6 large potatoes, cut in slices; salt and pepper; boil rapidly ten minutes, thicken with watermeal to stew. Have ready dumplings: mixed the biscuit, roll out, cut in squares, put in pot and boil rapidly ten minutes.

And really, Mr. O'Reilly, you could not taste better if you were in Donegal.

Wishing Mr. O'Reilly

What is wished of himself

A pleasant good night

And sweet dreams to O'REILLY.

MARGARET MURRAY.

No. 15 Mason street, Worcester.

AS IT IS MADE "AT HOME."

Editor BOSTON AMERICAN:

Here is my recipe for Irish stew, the way we make it on our bountiful farm: 2 good lbs. 2 pounds of chuck beef, cut up in small pieces; 1 carrot, 1 small parsnip, turnip, 1 onion, and 1 sprig of parsley, cut all up fine; 6 or 8 potatoes cut in quarters, season to taste and add a little flour to thicken the gravy; let simmer until done.

MRS. FRED VALLEY.

Auburndale.

A RECIPE FROM COLORAINE

Editor BOSTON AMERICAN:

Here is the Irish stew as made in Coleraine. Ingredients, sufficient for four to six people—Potatoes, fifteen; round or rump steak, one and one-half pounds; large onions, two or three; salt, pepper; stock if available or water. Thoroughly peel potatoes (if you use large ones cut them into even sized pieces. Trim neatly all the fat off the meat and put a thin layer of this in the bottom of the pan. Next put on an onion; this fat prevents burning. Over the fat, a layer of potatoes, then half the onions sliced in rings, then the meat cut into thick slices, then the rest of the potatoes and onions. Slice the onions. Slice the potatoes and on top the remainder of the potatoes. Slightly season with pepper and salt each layer and then cover the whole with stock or water. Bring the stew quickly to a boil, then simmer slowly at least two and one-half to three hours, adding the pan an occasional shake. Skim off the fat which will rise to the top of the cooked. Genuine Irish stew never contains any other vegetables but potatoes and onions. Slow cooking is the secret of success. CATHERINE M. LODGE.

No. 53 Mount Vernon street.

MRS. BELMONT SEES A BITTER WAR ON MEN

SUFFRAGISTS' WAR CRY IN BATTLE FOR BALLOT

Desert the homes and needs of men. Boycott the churches and hospitals. Refuse all offers of marriage. Do not work in men's place of business.

Ignore your present masters until placed on an equal footing with them.

NEW YORK, Sept. 23.—The present suffrage movement is only a crusade to prepare women for a general strike and boycott against men for the purpose of obtaining the ballot according to Mrs. O. H. P. Belmont.

In an interview with Allan L. Benson, published in Pearson's Magazine for October, the wealthy suffrage leader declares that the present peaceable movement for suffrage is foredoomed to failure, that it is only a preliminary skirmish to the conflict of future generations, when women will band themselves together, and never surrender until placed on an absolutely equal footing with their present masters.

Mrs. Belmont even admits that there is a possibility of bloodshed.

"Woman's nature enables her to get along better without man than man can get along without woman," says Mrs. Belmont.

"She could stand the strain long enough to bring him to her just terms. She suffers now only because she does not know her power. Let her use the means within her reach.

"Let her withdraw from the church, the world's greatest civilizing influence. The church cannot stand without her.

"Then let her walk out of the hospitals. Nursing is essentially woman's work. Let women do all of these things, and I ask you as a man what would happen?

"I think a good many will die in the hospital. But that would be among least important of all the results—great as it would nevertheless be. The battle would be over in a very short time. And, personally, I feel that this is the way in which suffrage will come time be brought about.

Mrs. Belmont also expresses the view that woman should continue to earn their own living after marriage. She said she had indicted thirty-five or forty women to marry only on that basis.

"I urged every woman never to surrender to any man her financial independence. I always advised a girl to wed a man only on the condition that she be permitted to continue to earn money and keep what she earned."

WEDS PRETTY BRIDESMAID IN CHURCH AISLE

Immediately following the marriage of Miss Shirn Hamilton of Allston and Carl J. Johnson of Quincy in the Allston Methodist Episcopal Church one of the bride's attendants, Miss Vincent, stepped forward and meeting Ernest Colpitts of Dorchester in the aisle, was married to him on the spot. Rev. Frank G. Potter, pastor of the church, officiated at the double ceremony.

The marriage of Miss Vincent, who is a cousin of the bride she had attended, was planned as a surprise for the last moment. A few intimate friends had been let into the secret, including Rev. Mr. Potter, but many among the wedding guests were treated to a genuine surprise when the demure bridesmaid indicated that she had certain other reasons for being present in the bridal party.

Miss Vincent was engaged to be married to Mr. Colpitts, but their friends thought that the date would not be set until some time later. The young couple talked matters over a few days ago and concluded that there was nothing to hinder their being married with the other couple.

40,000 ATTEND ROCHESTER FAIR

ROCHESTER, N. H., Sept. 23.—With a daily attendance of 40,000 people, the success of this year's Rochester Fair has been assured. Governor Henry B. Quinby and his staff spent Wednesday at the fair. Friday will be governor's ancestor day. A new feature of the fair this year is the night show which coincides with a balloon ascension and parachute leap from a flaming balloon. For the first time in the history of the fair there has been no pool selling on the races allowed.

5,085,380 BALES OF COTTON USED IN '09

WASHINGTON, Sept. 23.—The preliminary report issued by the Census Bureau today on cotton consumption shows the number of bales held August 31 in the United States to be 1,510,922. Of this number 702,988 were held in the cotton growing States. In the United States in 1908, 5,085,380 bales were consumed to August 1, employing 27,783,491 active spindles.

ALBANIAN CHIEF IS KILLED IN BATTLE

CONSTANTINOPLE, Sept. 23.—Ramazan Yaskok, the Albanian chief, was killed in a battle between Turkish troops and Albanians near Libanda, according to official advices arriving here to-day.

TO-DAY'S CABLE NEWS

Up to Midnight, London Time

Abruzzi Had Three Days' Visit With Miss Elkins.

ROME—The Duke of the Abruzzi has arrived here, having come from Southwestern France by the Mont Cenis route in an automobile. It is asserted that he came from Cahn, twenty-five miles southwest of Geneva, where he had spent three days visiting with Miss Katherine Elkins and her mother, who left Paris eight days ago for Switzerland. Much talk has ensued by the Duke's failure to stop in Rome to pay his respects to the King, but pushing straight on to Chatera, forty miles south, to see his elder brother, the Duke of Aosta, the head of his family.

Irving Plays Mathias.

LONDON—H. B. Irving opened the new season at the Queen's Theatre with "The Bells," in which he played his father's famous part of Mathias. The Daily Chronicle says: "Practically everything that roused the Lyceum audience that memorable night of 1871 is to be found in the performance of Sir Henry's worthy son." The Standard says: "Mr. Irving made a deep impression. He lacks as yet the compelling magnetism and grotesque spirituality of his father, yet his rendering of the chief character recalled the great actor in quite a vivid fashion. Mr. Irving had a magnificent reception when he made his entrance, but this reception at the end of the play was even more magnificent."

No Leniency to Suffragettes.

LONDON—The leniency that the law has hitherto shown toward arrested suffragettes was abandoned for the first time when two women rioters at the recent meeting at Birmingham which was addressed by Premier Asquith were convicted of assaulting the police and wilfully damaging property and sentenced one to four and the other to three months imprisonment at hard labor. The prisoners, who seemed to expect the tenderness shown by London Magistrates, gasped with astonishment when the sentences were passed. One exclaimed dramatically: "We will sentence the next man who holds a political meeting to death!"

Roxburghes Will Entertain.

LONDON—The Duchess of Roxburghe will take rank among London's great hostesses next season. Ever since Miss Goelet's marriage to the Duke of Roxburghe her entry into the social arena in a manner befitting her rank and fortune has been looked forward to at the beginning of every season, but for one reason or another the Duchess has contented herself with playing a very small part in the Summer gayeties. Now, however, she has taken Chesterfield House, one of the biggest mansions in Mayfair, from Lady Burton, will entertain there in commensurate style.

Coming to Study Cotton.

BERLIN—Colonial Minister Dernberg sails for New York to-day to study cotton raising in the Southern States of North America. The Colonial Minister has been experimenting for eight years with cotton in German Togoland, Africa, employing educated negroes from the Southern States, besides several Texans superintending farms. In 1908 Togoland exported 165,000 bales, the next year 233,000 bales, and 285,000 bales in 1908.

Senator Aldrich in Paris.

PARIS—Senator Nelson W. Aldrich of Rhode Island and Professor A. P. Andrews, members of the United States Monetary Commission, are in Paris, conferring with M. Pallain, Governor of the Bank of France, and other distinguished financiers and economists. Senator Aldrich said that he and Professor Andrews were simply gathering information to fill up certain gaps in the investigation of last year, necessary to complete the report.

184 Revolutionists Sentenced.

ST. PETERSBURG—Sentences were pronounced to-day on the 184 revolutionaries who raided the Katherine Railroad in 1905, fighting a bloody battle with the police in which thirty-two persons were killed. Six of them will be hanged at Ekaterinoslav, and twenty-six were given life sentences; twelve received eight-year sentences, forty got six years, twenty-five were given four years and forty-six others received lesser terms. The remainder were acquitted.

Whaler for Antarctic Trip.

LONDON—Assuming that funds be found to meet the expenses of Captain Scott's Antarctic expedition, the ship that will be used in the old Dundee whaler, Terra Nova, now owned by Bowring Bros. of St. John. She was employed by the Admiralty as a relief ship for the Discovery expedition in 1903, and in 1904 she carried an expedition to Franz Josef Land.

Plague Scare in Ecuador.

GUAYAQUIL—During the two weeks ended September 14 there were forty-seven cases of bubonic plague here, fourteen of which resulted fatally. Yellow fever claimed four victims, nine of the patients recovering.

Nearly everybody in Boston reads the AMERICAN.

FOUGHT ON CONSTITUTION.

PHILADELPHIA, Sept. 23.—William Markhee, the only surviving member of the crew of the old frigate Constitution, today celebrated his 107th birthday in the Naval Home in this city.

LOWELL SEES NEW SIGNS OF LIFE ON MARS

A telegram received today from Professor Percival Lowell, who is at his observatory at Flagstaff, Ariz., declares that the Antarctic canals on the planet Mars are disappearing. The message was received by John Ritchie, Jr., of this city. When Mr. Ritchie was seen by a reporter about the phenomenon he said:

"Professor Lowell's theory is that as the sun moves North or South, its approach to either Pole melts the ice, thus allowing the water to run toward the equator.

"He has also noticed a distinct change in the tints as the seasons change at either Pole, thus giving strength to his theory that there is moisture and hence life on the planet.

"These recent changes have been observed at the South Pole and works south, while our Summer starts from the south and works northward."

SHOOT DOG GUARDING HIS MASTER'S BODY

ROCHESTER, N. H., Sept. 23.—Guarding the body of his master, a large St. Bernard dog had to be shot before anyone could touch the body of his master, Horace Hall, who was found dead in his shanty house on East Rochester road. When Hogy was discovered some time ago for chicken stealing, the dog refused to be separated from him, and went to jail with his master. Hogy was fifty-eight years old, and was taken ill before starting for Dover.

WATTERSON'S SON LEFT OVER $26,000

NEW YORK, Sept. 23.—Appraisal of the estate of Harvey Watterson, Colonel Watterson's son, who was killed last November by falling from his office window on the pneumatic dome of the Trust Company of America building at No. 37 Wall street, shows that Mr. Watterson left a gross personal estate of $26,726.38, not $26,719. It was mostly in insurance policies, and all went to his wife, Alice H. Watterson. In trust.

The SUNDAY AMERICAN is the Seventh Day Wonder of New England.

PRIEST IS SLAIN IN RELIGIOUS RIOT

BARCELONA, Sept. 23.—Religious rioting at Castro resulted in the killing of two men and the wounding of fifty-six others. A religious procession with the local priest at its head, was about to enter the church at Castro, when it was attacked by an armed mob. The priest and another man were instantly killed, and before the gendarmerie could restore order, fifty-six persons had been wounded.

MEMORIAL SERVICES FOR FRANK PARSONS

Services in memory of the late Professor Frank Parsons will be held on Sunday evening at 8 o'clock at the Ruggles street House, No. 112 Salem street. The Frank Parsons Club of the Ruggles House has charge of the services. Miss Ida Pierson and Ralph Albertson will be the chief speakers of the evening. The public is cordially invited to attend the services.

More AMERICANS are read in the homes in Boston than any other paper.

AMERICAN MINING CONTRACTOR KILLED

GUADALAJARA, Mex., Sept. 23.—John M. Grier, an American mining contractor, and five native miners have been killed by a premature explosion of dynamite in the Pertegria mine in Guanajuato district.

CHARLES H. DRAPER OF BROOKLINE DEAD

Charles H. Draper, for forty-nine years cashier of the First National Bank of Boston and for the past seven years president of the Brookline Bank, died last night at his home, No. 87 Harvard avenue, Brookline, at the age of seventy-two.

SATISFY YOURSELF—Proof in the SUNDAY AMERICAN that it is impossible to get the germ that grants the baby's suffer.

SEEKS WOMAN SLAYER.

MONESSEN, Pa., Sept. 23.—Mrs. Catherine Guist, sixty-three years old, is dead, the result of a blood clot on the brain, one unknown, while making new plans for her daughters home on the farm several miles from here. The police are investigating the murder and also that of an unknown foreigner who was killed at Bernard, his body placed on the Pennsylvania railroad tracks.

Big Austrian Welcome to Braganza and Bride

First photograph received in America of Anita Stewart and Prince Miguel de Braganza, together, made the day before their marriage.

VIENNA, Sept. 23.—The Austrian court circles is preparing a round of festivities for the Prince of Braganza and his bride, the former Anita Stewart of New York, who will spend a portion of their honeymoon here. They will be received by Emperor Franz Josef.

SELL ALL AND WAIT FOR END OF WORLD

Continued from First Page.

take up the time until sundown to-morrow, for then the Lord is due.

"He's on his way now," one woman cried to-day in meeting, "I got the message in the night that the Lord had left his throne and was on his way to save the faithful."

Three women fainted to-day after receiving the inspired words. One woman in a trance shrieked and while shrieking and waving her arms walked toward the door and out into the field, where she collapsed. Other children felt the spirit coming and rose in their places, giving manifestations.

One sneaker, she who bore the message that the Lord had left his throne and was on his way to the earth, was first heard as silence.

Then suddenly one woman arose in her place and with arms extended to the sky began flapping her hands from the wrists and murmuring "Hallelujah." Then another rose and went through the same pantomime until finally 200 men, women and children were standing, their bodies shaking in a religious frenzy, their eyes closed and wet, their faces drawn and their hands flapping upward as if preparing to ascend at the coming of the Messiah.

Baptized in Pond.

Children of ten and twelve years, girls to girls and young men, bearded men and old women all are praying and singing for salvation. Those who have not been baptized were taken to-day to the pond about half a mile from Ashod, the camp, and immersed. Then the whole party returned to pray.

The frenzy of the disciples in making it hard to keep order in the meetings. The Rev. James E. Osgood, for twenty-five years elder of the camp meetings here, says it was a religious outbreak as was ever displayed in New England.

"They believe and I believe that the end is near," he said. "And we have the love of the Lord in our hearts and wish to show it in these last few hours."

The cause of all this preparation is the revelation that Eva Brown of Pawtucket says came to her a year ago.

"In my dreams and later in my waking hours," she declares, "the Lord told me that on the tenth day of the seventh month He would come to us again, and coming would burn off the top of this injurious earth.

"Then we who hearkened his word would come into the kingdom and all the others would be swept away.

"And the tenth day of the seventh month is the eve of the Jewish Day of Atonement, September 24, when the Lord closes the book of life. Surely that is the day for the world to end."

Boston People There.

From all over the country the faithful have come to this out-of-the-way village, five miles from Duxbury and an equal distance from any other near station. Most of the believers have brought their families with them, confident in their belief that only by fasts being will they be able to assure life to their loved ones. For their camp is the only place that will escape the wrath of the Almighty.

Besides has lent its share to the camp, for Mrs. and Mrs. E. W. Francis of Cambridge are there. The Rev. Mr. Chamberlain of Medford has been there for two weeks. And many others from Charlestown and Brighton refused to give their names, fearing the scoffing of an unbelieving world in case the Messiah should postpone his visit.

The camp is not composed of poor or uneducated people. Many of those who have sold all their property in preparation for the Day of Wrath and Mercy are wealthy. One Virginia family sold $50,000 worth of property and came. A young man from Dedham, and his wife, Mr. and Mrs. J. E. Jones, sold their home and furniture and he gave up his position. Both are sure the world will come to an end within twenty four hours.

And there are college men there, graduates of scientific schools, and six clergymen.

Four Messages Heard.

Up to this year the Free Christian Society has held semi-annual conventions at Ashod, meeting in the camped with the Rev. James E. Osgood as presiding elder, but this year the message that the end of the world is near became so convincing that the ordinary meetings were given up and the grand prayer to waiting for the day was substituted.

In four distinct places did we hear the message, says the Rev. Mr. Osgood. "Out in Los Angeles a woman arose and spoke to us in unknown tongues. Interpreters put back from India interpreted her words as a prediction that the world would end on the tenth day of the seventh month."

Previous to that Eva Davis of Pawtucket got the message from the Lord. It was distinct and clear, though spoken in the unknown tongue. All who heard her tell it understood.

Then a woman in Maine brought the message that September 24 was the day. And from the South came the same word. "Could we deny that it was the word of God?

"Will you be here throughout the long prayer meeting to-night and to-morrow?" he was asked.

Makes Sure of Crops.

"I will if it rains," was the reply, "for I'm busy getting in my cranberries and other crops."

"Do you believe that the world is coming to an end to-morrow?

"Most of the people here do, and I'm with my people. They have the love of God in their hearts and the Lord speaks to them."

"But why get in your crops when the world is coming to an end, or don't you believe with the rest of them?"

Mr. Osgood turned away with a twinkle in his eye. "I'm going to get in the crops, young man," he said.

"What will you do if the Lord does not come to-morrow?" one of the other leaders was asked.

"The Lord has spoken and will be here before sunset to-morrow," was the only reply.

BRIDE REFUSED TO PRAY; ASKS DIVORCE

TOPEKA, Kan., Sept. 23.—If a bride, although contending that she is a devout christian, refuses to join her husband in kneeling at family prayers, is that a cause for divorce? A. M. Barber gives that as his complaint in a petition filed in the District Court of Shawnee County. Mr. Barber is seventy-six years old and his bride of last June is sixty-six years old. Mr. Barber is a deacon in the First Baptist Church. His petition says that after their marriage he bade family prayers and she, instead of acting in sympathy with him in such services, refused to kneel during the prayer and refused to even bow her head.

TAFT SOUTHERN POLICY PRAISED BY DICKINSON

NASHVILLE, Tenn., Sept. 23.—The great attraction at the Tennessee state fair today was Secretary of War Dickinson, who referred in complimentary terms to President Taft.

"President Taft," said Mr. Dickinson, "has gone further than any Republican President to meet the wishes of the South in establishing a policy looking to the promotion of peace within our borders. He patriotically and courageously does what he believes is best, fortifying himself for his vindication. The great body of his upon the confidence of the country at least holds judgment in abeyance. It is does not at once gain entire approval.

"His vindication will depend mainly upon the wisdom, self-sacrifice and conservation manifested by the southern people. It would be a calamity if his efforts should be nullified and his good will misjudged. If a spirit of fair consideration and patriotism fails, then it will be long before another will follow in his footsteps. No question of the south giving him political support is involved."

DARTMOUTH OPEN; 350 NEW STUDENTS

HANOVER, N. H., Sept. 23.—Dartmouth college opened its doors for today with an attendance eclipse many of her earlier. The reinvestion of former President Tucker having taken effect and the inauguration of President-elect Ernest M. Nichols has not occurring until another month, the opening of college found the institution without a president in office, although the duties of president were cared for by Professor John K. Lord.

THE LATEST SCOOP PAPS—If you want to know the style to dress you must read this specialists illustrated feature in the SUNDAY AMERICAN. Each hat described in detail.

9 PRISONERS DIE IN ESCAPE PLOT

ST. PETERSBURG, Sept. 23.—A dispatch today from Odessa says that nine prisoners were killed and nine others as well as four guards were wounded in a concerted attempt to effect a jail delivery there. The prisoners, numbering nearly, were being taken out for exercise when they attacked the warders.

350,000 GALLONS OF OIL IN EXPLOSION

NEW YORK, Sept. 23. A tank containing 350,000 gallons of petroleum exploded today in the Constable Hook plant of the Tidewater Company, a subsidiary of the Standard oil. The fire within followed spread to the barrel factory. The damage is $100,000.

The SUNDAY AMERICAN is the Seventh Day Wonder of New England.

UNIFORM INSPECTOR NEW CITY WORKER

Another job has been added to the long list of creations on the city payrolls, that is "inspector of uniforms," in the sanitary division of the street department, which job he has bestowed upon Michael F. Foley, has the new job, and his is the duty of inspecting uniforms of the some 200 odd "white wings" who patrol the city streets with brooms and shovels, brooms and pushcarts, and in the street style "moquetteau" Khaki garb.

HOW OLD IS LITTLE JOHNNY JONES?

Here is a little brain twister for old and young to work upon.

When teacher asked little Johnny Jones his age, he replied:

"When I was born my sister was one-quarter the age of mother. Sister is now one-third as old as father and I am one-quarter of mother's age. In four years I shall be one-quarter as old as father."

How old is little Johnny Jones? The AMERICAN wants to know and requests you to send brief answers to the AMERICAN office. Address letters JOHNNY JONES CONTEST, AMERICAN, Boston, Mass.

MILLION SPENT ON HUDSON FET

Continued from First Page.

last night, at which the Netherlands commissioners were the guests of honor.

Toast to Wilhelmina.

Among the speakers were Judge Augustus Van Wyck, who made the address of welcome. At the conclusion of his speech he proposed a toast to Queen Wilhelmina. Other speakers were Henry S. Van Dusen, J. F. Dynes of the Netherlands Committee; C. F. Van Beghem, chairman of the Netherlands delegation; W. H. Von Loewenen, burgomaster of Amsterdam; Warner Van Orden, and General Stewart L. Woodford.

The rush is already on. All trains entering New York are showing a decided increase in passenger traffic. To-morrow the number of trains will be doubled to handle the excursionists.

Conservative estimates place the number of strangers who will be in the city during Hudson Fulton week at 1,000,000. Many hotels are already filled up, and in others all accommodations are booked. Rates have been doubled and rooms are usually sold for $1 and $1.50 per day have shot up to $3 and $4 and $7. The normal capacity of these hotels in New York proper is about 200,000 a day, but arrangements have been made to accommodate 800,000 next week. Excursion rates are being offered from as far away as Chicago.

Million Already Spent.

General Stewart L. Woodford, the chairman, in a congratulatory speech at a meeting of the celebration commission, said that to the present time the commission had spent approximately $1,000,000. The books of the commission balanced, he said, within $10,000. He could not tell yet whether there would be a deficit of that amount, but he added that there would not be a great deal more spent before the celebration was ended.

The grave of Robert Fulton in Trinity church yard will be decorated daily for a week by the Robert Fulton Monument Association, the first organization formed to do permanent honor to the memory of Fulton. The grave was decorated to-day with flowers and with wreaths of laurel. Americans flags.

The Robert Fulton Monument Association is protecting the idea of a water gate, shows the most picturesque and becoming to be used as a point of reception where forts.

persons of note from foreign countries visiting the city must be received, which edifice will stand as a permanent memorial of Fulton and his work. There is to be erected on the Hudson, between One Hundred and Fourteenth and One Hundred and Sixteenth streets.

Warning to Householders

Police Commissioner Baker has taken the of the arriving throng by issuing upon better of general instructions to forces for the protection of their homes. commissioner says that it is to be pected that there will be many unscrupulous persons among the visitors, and must not be forgotten that there are unscrupulous residents in New York. He all householders to all the police by a big special care to lock their homes securely when leaving them during the celebration.

SIEGEL SHOWS STYLISH HAT

The query in so many feminine minds as to what the millinery fashions for Fall and Winter are to be and whether they are to overrule and becoming has received affirmative answer in the new modes as shown in an exhibit at Siegel's.

After a survey of the most sensational and extreme styles suitable in general but few, and decidedly trying or even impossible for many, the information assumes that this is to be a season of unusually becoming styles.

The Cossack and turbinas, as well as the Arabian draped turbans, colonials and marquise, and the many modifications of medium-sized three-cornered shapes are especially popular.

The hats of medium or even large proportions have outlines so artistic as to seem to some for the more formal shows the most picturesque and becoming

STATE TROOPS ESCORT BODY OF JOHNSON

ST. PAUL, Minn., Sept. 23.—With military honors, the body of Governor John A. Johnson was escorted from the grounds of the State Capitol today to the train which carried it to St. Peter, where services were held and interment made in the Bethlehem hill cemetery in the Johnson family plot.

At 9:15 o'clock the pallbearers entered the casket in the hearse through a line flanked by honorary pallbearers. The active pallbearers were P. A. Day, F. B. Lynch, T. D. O'Brien, E. T. Young, A. C. Weiss and J. C. Wise. The honorary pallbearers included ex-Governors L. F. Hubbard, John Lind, S. R. Van Sant and Knute Nelson, Governor Eberhardt, Governor John Burke of North Dakota, Chief Justice Myrick and President Cyrus Northrup of the University of Minnesota.

The hearse was preceded by a band of ten pieces, ten companies of state militia and three batteries of artillery. A special guard of honor accompanied the body upon the special train.

The funeral train was due to arrive at St. Peter shortly after noon. At St. Peter it was planned to hold the services in the Presbyterian church, which is to be encased was once a member of the church. St. Peter was in deep mourning, and sympathy for the family of the dead executive was expressed on every hand.

What Rhode Island Coal Means to New England

By HOWARD NOBLE.

The discovery of a six-foot vein of pure anthracite coal 1500 feet east of the South Shaft on the property of the Rhode Island Coal Company at Portsmouth, R. I., has made secure the claim of eminent geologists that this coal field is one of the most extensive and most valuable on the American continent. The outcroppings of this vein have been marked for years on both the eastern and the western borders of the property, but its recent location at a depth of 840 feet by means of a diamond drill set up more than a quarter of a mile from the original shaft proves beyond question that the coal deposits are constant over an immense area.

The discovery of this vein is made public for the first time to-day. Its significance, taken in connection with the previous discovery of a seventeen-foot vein on another part of the property, can scarcely be exaggerated.

It means, in plain English, unhampered by technical terms, that the Portsmouth coal field, which lies in the heart of the great Narragansett Basin, is destined to give rise to one of the most profitable industries in the East—an industry the development of which is bound to advance the material wealth of this section of the country, and, incidentally, to affect favorably the fuel problem of New England for perhaps a century to come.

These statements may appear startling, even extravagant. We are accustomed, here in New England, to regard anthracite coal as an exclusive Pennsylvania product, notwithstanding the assurances of geologists that coal is one of the most widely distributed of all minerals. That Rhode Island—the island of Rhode Island—is rich in pure anthracite, that it may be made to produce an enormous quantity of coal suitable for all purposes for which the anthracite coals from Pennsylvania are used, almost staggers credulity and well-nigh paralyzes belief. Mines and mining of whatever kind are not associated in the mind with any practical business achievement in this corner of the United States. We have cotton mills, shoe factories and a multitude of other manufacturing industries, and in these departments of endeavor we are justly accorded first place in industrial annals. But that mining, the mining of coal, may become one of the leading enterprises of granite-ribbed New England—the whole proposition is extraordinary, upsetting, revolutionary.

Some Doubts Dispelled.

This attitude, I take it, is typical of the average person. It was my own attitude up to a few days ago, when, in pursuance of the day's work, I visited the Portsmouth mine of the Rhode Island Coal Company. I had some pretty definite ideas on the subject of New England coal mines. I knew, in a general way, that geologists had said that coal was to be found in abundance in the Narragansett Basin; but I had talked with hard-headed men of "the street," who had assured me that there was nothing in it from a commercial standpoint, that the entire subject was one which must be forever relegated to the realm of the scientist, not that of the practical miner; and, notwithstanding the glamor thrown over the new enterprise by a name which stands for much in the world of industrial promotions, I was distinctly skeptical. Concerning the mine at Portsmouth, I had arrived, through sources of information apparently trustworthy, at three very definite conclusions: First, that the mine had been worked out by the early operators; second, that all the pumps in the world would prove inadequate to hold in check the waters of Narragansett Bay, which poured into the workings in an uninterrupted stream; and third, that even if coal existed in quantity and the water could be conquered, the coal would not burn, owing to its extremely low volatile properties.

Today, after a thorough inspection of the mine at Portsmouth, and of the conditions under which coal must be mined there, I have arrived at the following conclusions, based upon fairly good eyesight and what I believe to be common sense:

First—The coal is there practically in unlimited quantities, the unit of computing which must, as Prof. Shaler pointed out years ago, be spoken of in hundreds of millions of tons.

Second—The mine is practically free from water, so free that the waters of Narragansett Bay will probably have to be utilized in washing the coal to prepare it for market.

Third—Rhode Island coal, when treated by the patented process controlled by the Company, burns with a generous, ruddy blaze, giving off an intense heat, being devoid of noxious gases and burning down to a fine red ash almost entirely free from clinkers or other foreign substance.

Splendid Coal for Smelting.

Concerning these three prejudices which popularly exist against Rhode Island coal, I shall have more to say later on; in the meantime it might be well at this juncture briefly to review the history of mining operations at Portsmouth.

Anthracite coal was first discovered in Rhode Island in 1798, and was first mined in quantity in 1808, which was prior to any similar operations in this country. At that time very little was known about the requirements necessary for the successful burning of anthracite. As a matter of fact, great difficulty was experienced in burning Pennsylvania anthracite until the art of preparing and sizing it had been learned. By that is meant the proper washing of the coal and the breaking of it into the right sizes for stove and furnace uses. In previous attempts to market Rhode Island coal for domestic purposes, the product never had the benefit of correct handling and consequently gave indifferent results.

This coal was, however, for many years successfully utilized for smelting purposes, and in that industry was regarded as the finest in the United States, up to the advent of coke. The product of the Portsmouth mine was shipped in great quantities as far West as Pittsburg for the smelting of iron ores; and up to the time of the imposition of a prohibitive tariff on foreign copper ore, the Taunton Copper Company operated a large smelter on what is now the property of the Rhode Island Coal Company, utilizing the coal for the smelting of Cuban and South American copper ores.

Earlier Development Killed by Tariff.

The large slag piles left by this concern are still in evidence, showing that vast quantities of the coal must have been used for that purpose. The Taunton Copper Company did all of its mining at the lower levels of the old workings. It is estimated by competent engineers that at least 1,500,000 tons of coal have been taken from the property, and that up to the present time the field has scarcely been scratched, probably less than one per cent. of the total deposits having been taken out by former operators.

The copper smelting industry in Rhode Island died because of the tariff on the ore. The business was dependent upon the smelting of foreign ores, as Western copper ore could not be brought into New England by reason of the excessive railroad freight charges. The old superintendent of the mine under the Taunton Copper Company regime has said that Mr. Crocker, the head of that company, told him on the day operations were abandoned that the value of the property appeared greater to him than at any time during his connection with the company. This former superintendent always held that had Mr. Crocker lived the property would have been developed along other lines, and that New England would have long ago enjoyed the immense industrial benefits resulting from the production of anthracite coal, which have accrued to Pennsylvania instead.

After Mr. Crocker's death the property was sold to the Worcester Steel Works, of which Mr. George M. Wright was the head. On the failure of that concern the property reverted to the Rice heirs of Boston. Since then several parties have pumped out the mine to a limited extent, but insufficient capital and lack of proper organization rendered these attempts at mining unsuccessful.

For thirty years or more the property remained idle, and finally the attention of Mr. J. W. Dennis, who is now vice-president of the Rhode Island Company and superintendent of the mine, was attracted to the property, having become acquainted with the process invented by N. W. Bloss, which has since been patented and is controlled by the company. This process consisted of the application to the coal of a chemical which caused it to burn as freely as the best grades of Pennsylvania anthracite. The Bloss process has since been superseded by a discovery of Mr. Henry J. Williams, the famous Boston chemist and coal expert, and this latter process has likewise been patented. Under the new process the cost of treating the coal has been reduced from twelve cents per ton to about one and a half cents.

First Work by New Company.

After three years of practical tests and demonstrations for improved combustion, it was proved by actual experience and scientific research that the process gave perfect combustion of this fuel. Mr. Dennis then submitted the proposition to Mr. Henry M. Whitney, who, after a most rigid investigation covering every phase of the subject, became satisfied that the Portsmouth coal mine was a property of immense value. In December of 1908 Mr. Whitney decided to take the proposition over. A lease of the property of the Rice heirs was secured, and in February, 1909, a new company was capitalized under the laws of Maine for $5,000,000, of which $4,000,000 has been issued, known to-day as the Rhode Island Coal Company. This company controls the mining rights to about 4,000 acres, and it owns outright about 400 acres of land.

The first thing to be accomplished by the new concern was the pumping out of the old shafts. This work has progressed very rapidly, and it is estimated that the mine will be entirely free from water within six weeks. All the drainage into the mine is collected in a reservoir about 600 feet below the surface. Below this the mine is as dry as the proverbial bone. During my recent visit to the mine I witnessed the operation of one pump of average capacity, placed at the reservoir. In less than half an hour it disposed of the water which had accumulated over night in the reservoirs. Mr. Eugene Powell, a civil engineer formerly in the employ of the Delaware, Lackawanna & Western Railroad and in the drainage operation of Pennsylvania, informed me that the Portsmouth mine was the freest from water of any coal mine he had ever seen. Some of the most noted mining engineers of the country have given it as their opinion that the company will be forced by this very lack of water in the mine to wash the coal with water procured outside, which is an important consideration in the cost of mining operations. In the Portsmouth mine, solid barriers of slate and sandstone act very much as would concrete walls in keeping the water out. When the present company took hold of the property the mine was, to be sure, full of water; but it must be remembered that more than thirty years had elapsed since the last stroke of a pump.

Primo Object High-Grade Fuel.

William F. Sckel, a mining engineer for twenty-five years in the employ of the Delaware, Lackawanna & Western, has accepted the position of engineer in the company, and his assistant, Mr. Powell, is now on the ground making a survey for the erection of the first one-thousand-ton breaker and a briquetting plant of three hundred tons per day capacity. It is anticipated that the erection of this plant and the installing of mining machinery and underground equipment will be begun within the next thirty days and that the output of the coveted coal will be under way by January 1, 1910. About thirty men are now employed in getting the old workings ready, all that can be used in the buildings at present. Once mining operations begin in earnest the number of workmen will be very largely increased. Within a month or so the erection of dwellings will be commenced, also the laying of tracks to connect the mine by rail. Later on wharves will be built to facilitate shipments by water.

The prime object of the company is the marketing of a high-grade fuel for domestic uses in the form of coal and briquettes. The company fully appreciates the commercial possibilities of generating electric power on the premises. With a coal content of the purest conservatively estimated to run into the tens and even hundreds of millions of tons, and suitable for use in producer gas plants, the company anticipates inexpensive quantities of electricity at a much lower cost than it can be produced elsewhere in New England. The Edison Company, for example, which enjoys a protected monopoly in the Boston district, charges 10 cents per kilowatt hour for its electricity, claiming that its product cannot be generated and distributed at a lower price with fair profit to the company. Experts have figured that the Rhode Island Coal Company can generate electricity by gas producer engines at a cost of three-quarters of a cent per kilowatt horsepower hour. Within a radius of thirty miles of the mine there is a ready market for 500,000 horsepower. Electricity produced at this trifling cost can be transmitted to Boston and intervening cities at an enormous profit. This feature of the proposition alone promises Calumet & Hecla dividends. The possibilities are so vast as to make one hesitate even in making mental computations. But HUGE GAINS IN ENORMOUS QUANTITIES, and practical tests have demonstrated that the product of the Rhode Island Coal Company is as perfect for gas-producer purposes as the best quality of Pennsylvania anthracite.

Briquettes Are Very Profitable.

The Rhode Island Coal Company, however, does not purpose to embark immediately upon a business policy the ultimate result of which must mean the overturning of existing methods of power application in New England. For the present the company will rest satisfied to let that end of the business work itself out as it may, and will confine its energies to supplying the people of cities and towns near the mines with a domestic fuel at a price which will easily ensure the sale of all its product. It has been conservatively estimated that every ton of coal mined for household consumption will net from $2.50 to $3.00 per ton, and that when in full operation the mine will produce from four thousand to five thousand tons of coal daily. But considering that the total consumption of coal in New England, both anthracite and bituminous, is about 30,000,000 tons annually, it will still be but a small proportion of the total requirements. The waste—the dust and coal debris—will be made into briquettes, and this product should bring a price fifty cents a ton in excess of the price of the coal itself, inasmuch as most people who have become accustomed to its use prefer the briquette to the natural product for cooking purposes. The transportation facilities are of the best.

Three characteristics of this unique proposition struck me with particular force during my investigation of the property a few days ago. On entering the mine I noticed that there was little or no timbering in evidence. In following levels at a depth of one thousand feet I failed to see the usual wooden supports common to coal mines the world over. At the nine-hundred-foot level I penetrated to the end of an eleven-hundred-foot tunnel, flanked on one side or the other by a solid seam of coal averaging five or six feet thick; and not once did I observe any artificial support to the roof. In only one place throughout the entire length of that level had the former operators thought it necessary to leave even a supporting pillar of stone. This means that the character of the rock formation in which the coal seams occur is so hard and stable that supports of any kind are absolutely unnecessary. Such a condition of course makes for cheap mining.

The coal veins themselves are of anthracite, with no apparent mixture of slate, bone or kidney. In consequence, the equipment of the breaker to prepare this coal for market will be very simple as compared with the breakers of Pennsylvania mines, where complicated machinery is necessary to eliminate the impurities.

The second feature that impressed me during my exploration of the mine was the entire absence of gas. At a depth of a thousand feet the air was as pure and sweet as out of doors. The mine is splendidly ventilated, but even if it were not there would be no danger to life. The deadly "black damp" can never claim victims in the Portsmouth mine, for the simple reason that the coal is so low in volatile matter that it gives off no gas. For just about a century this quality proved a serious drawback to the exploitation of Rhode Island coal for household uses, but that obstacle has been happily overcome by the noteworthy discoveries of Bloss and Williams, whereby nature's defect is remedied by chemical agencies. Of the absence of water in the mine I have perhaps spoken with sufficient emphasis.

The Geological Formation.

The coal deposits in this section of the Narragansett Basin may be said to be roughly in the form of a shallow saucer. Four distinct veins, one lying on top of the other and separated by hundreds of feet of shale and sandstone, are said to be clearly defined in the old workings; and these, by the researches now being conducted by diamond drills, will be demonstrated. A word of explanation concerning the geological formation may be necessary to a proper understanding of the situation.

Hundreds of thousands of years ago the section of the Narragansett Basin, now known as the Rhode Island Coal Company's property, was an immense peat bog, which in the course of ages became covered with deposits of mud and sand that afterward turned into slate and sandstone. In time this overlying rock formation formed became the foundation for still another peat bog, and this deposit in turn was covered with mud and sand which turned to stone; and so on, until at least four distinct layers of coal were born, one layer on top of the each separated from the others by intervening layers of stone. Over all this area finally came the glacial drift burying the deposits to depths of feet deep with gravel and boulders. The weight of all this accumulation, combined with the internal heat of the earth, caused the edges to crumple upward, leaving the coal deposits like so many huge saucers filled one on top of the other with rock formations between.

Under such circumstances one would expect to find the edges of the coal deposits in the saucer outcropping at all points, north, south, east and west; and that is precisely what occurs. The coal deposits in the central area of the field probably lie nearly horizontal and at much greater depths than those near the edges of the basin. The Portsmouth field is identical in formation with most of the Pennsylvania anthracite fields. The two opposite outcrops are on the western edge of the basin, running downward toward the east at an angle of about thirty-two degrees to a depth of sixteen hundred feet, where they are said to leave off in a solid vein of coal seven feet thick.

Concerning the quality of Rhode Island coal there can be no doubt, according to scores of analyses made by one of the foremost authorities in the United States, Mr. Henry J. Williams of this city, a chemical engineer and analytical chemist of national reputation. Mr. Williams, whose office is at 161 Tremont street, was the chemist who analyzed all the coal for the Boston Finance Commission in the work carried on prior to the coal scandals, and it was upon his tests that several of the powerful coal companies were compelled to refund many thousands of dollars to the city for having foisted upon it coal not up to specifications. He is the originator of a system of specifications upon which the city of Boston annually purchases more than thirty thousand tons of coal.

What the Experts Say.

Mr. Williams is the inventor of an instrument for determining the heating qualities of fuel, known as the bomb calorimeter. This instrument has been officially adopted by the Bureau of Standards of the United States government, and the government paid a big price to each for the instrument. Identical instruments or "bomb calorimeter" manufacture have been purchased by Johns Hopkins University and other institutions of learning and research. A recently asked Mr. Williams, through Mr. Whitney's office, to furnish me with an analysis of coal taken from the property of the Rhode Island Coal Company at the two-hundred-and-fifty-foot level, which coal I knew to be inferior to the bulk of the product secured from lower levels. This analysis is what might reasonably be regarded as the approximate coal-quality which the company expects to realize after the mine has fairly into the veins, the coal in question containing only the normal quantity of water, which should not exceed five per cent. Following is the reply which I received from Mr. Williams:

Boston, Sept. 16, 1909.

Mr. Howard Noble,
Boston, Mass.

Dear Sir:—At the request of Mr. Henry M. Whitney I here state what the analysis of a sample of Rhode Island coal, which has not been exposed to water action for many years, gave by the bomb calorimeter. It contained approximately what I consider to be the normal percentage of water for that coal, viz., 5 per cent., this analysis being based upon an analysis of a small sample of "Rhode Island coal from the 250-foot level," which was submitted to me for examination March 8, 1909, and reported upon March 11, 1909.

The analysis of the coal under normal conditions would in my opinion be about as follows:

PROXIMATE ANALYSIS.

Moisture	5.00 per cent. or less
Volatile matter	3.30 per cent.
Fixed Carbon	83.19 per cent.
Ash	6.51 per cent.
	100.00 per cent.
Sulphur	0.30 per cent.

Calorific value of the wet coal, 12,537 B. T. U. per pound.

Calorific value of the dry coal, 13,197 B. T. U. per pound.

On a dry basis 6.85 per cent.

Yours very truly,
HENRY J. WILLIAMS.
Expert on Coal.

As Good as Penn. Anthracite.

Assuming that the average reader is a non-expert in matters pertaining to coal, the following statement by Mr. Williams may prove illuminating: "The quality of Rhode Island coal is such," he said, "that the company will be able to guarantee to consumers that every pound sold will burn as well as the best Pennsylvania anthracite. This guarantee is made possible by the original discovery of N. W. Bloss and by later discoveries of my own, which make of this coal a free-burning fuel of ideal quality.

"Three years ago when I began my experiments with Rhode Island coal I was decidedly skeptical as to the practical value of this product. I went into the mine and secured a great number of specimens, of all of which I kept careful records in testing, as to the amount of coal used, the amount of kindling, the degree of damper opened and the maximum production of flame. I first burned the coal without the chemical treatment, and followed these experiments by burning the treated coal. In these latter tests I applied the chemical myself. I left absolutely nothing to juggery or chance.

The Calorific Missing Link.

"I found that when the treated coal was burned under exactly the same conditions as the untreated, the coal kindled very much more rapidly, gave a much hotter fire and produced flames about thirty-six inches long, which were maintained to that maximum length for an hour and three-quarters, when they gradually decreased, but nevertheless remained long for a number of hours. With the untreated coal I was able to secure flames only five to eight inches in length, which soon disappeared altogether.

"In making these tests I eliminated every possible cause of producing flame, except the chemical; and having at last satisfied myself that the chemical was responsible for the result I set to discover a more economical agent. Bloss's original chemical was merely sulphate of petre, of which about twelve cents' worth was required to treat a ton of coal. I finally discovered a substitute in crude calcium chloride. Of this material about one and a half cents' worth is required to treat a ton of coal. On these discoveries the company has taken out three basic patents in this country, and has applied for patents in all the leading foreign countries.

"Rhode Island coal carries fully as low a percentage of ash as the average of the commercial coals from Pennsylvania, and there is absolutely no reason whatever why this product should not meet with equal favor. The calcium chloride does not wear off. It is absorbed by the coal, which, in being treated, is immersed in a solution of the chemical. Rhode Island coal thus treated has lain out of doors fourteen months and, after exposure to all sorts of weather, has burned as freely as though the treatment had been freshly applied. The chemical does not change the appearance of the coal; the most expert eye would fail to distinguish between coal that had been treated and coal in the natural state. It penetrates into the texture of the coal, a fact which is demonstrated by analysis of the ash, where it is found in considerable quantities. Crude calcium chloride does the work perfectly. It has made of the Portsmouth coal deposits a commercial proposition of tremendous possibilities."

Coal Burns Like Oak.

The opinion of a layman may or may not be of any substantial value in determining such a complex matter as the combustibility of coal. The analyzing of coal and the fixing of its caloric value is one of the toughest problems which the chemist has on his day's work, but regarding this subject, as with most others, the evidence of one's senses, even though he be a non-expert, is entitled to some consideration.

Apropos of which I wish to record some observations which I personally made at Portsmouth recently concerning the burning qualities of Rhode Island coal. Into the grate of a cook stove of ordinary dimensions I have a quantity of this coal placed and kindled. In an almost incredibly short time the coal, which had been chemically treated a month previously, burst into free flame, with long-streaming tongues of yellow light, which asserted had the coal consisted of well-seasoned oak. The heat given off was intense, and as far as I could judge the coal burned with the durability of the other anthracite.

There was an entire absence of blue flame, and even when the covers of the stove were removed there was no odor of coal gas. From the quantity of coal placed in the fire box the farmer's wife cooked for a fine dinner, as anyone could wish to sit down to. These data are not scientific, but I venture to say true to the average person, had he performed the experiment, the results would have proven entirely satisfactory.

Popularity of Briquettes.

No less interesting in its scientific and practical aspects is the briquetting phase of the proposition. Mr. R. A. Zwoyer, who has been retained as the company's briquetting engineer, is recognized as one of the foremost authorities in briquette-making in this country. He was the founder of the Zwoyer Briquetting Company of No. 66 Wall Street, New York, which is the largest concern of the kind in the United States. Mr. Zwoyer is the inventor of the process of briquette-making which will be utilized by the company.

"Briquettes, when properly made, always sell for a premium over coal," said Mr. Zwoyer. "They are cleaner than coal and are really a more economical fuel, carrying no waste and giving forth a greater heat-energy than the same weight of coal, and the beauty of the briquetting proposition is that the briquettes are made from coal-dust, which would otherwise be a total loss to the company.

"As an illustration of how popular briquettes become in any community into which they are introduced, I will mention one locality in New York City, the comparatively small area bounded by Third street, Eleventh street, Third avenue and Avenue A. In this single district a briquetting company with which I was connected last winter sold sixty tons of briquettes every day. This meant that practically the entire population of the district was consuming briquettes in preference to coal and other kinds of fuel; and this record was established in spite of the fact that, so far as I know, last winter was the first time a briquette had ever been introduced into that community."

Profits May Prove Immense.

The Rhode Island Coal Company looks forward to an ultimate production of five thousand tons of coal a day, although it will probably be several years before mining on such a scale is accomplished. The company hopes to be producing not less than one thousand tons per day within one year.

The possible earnings of this company suggest a field of fascinating speculation. Prospective profits are always fascinating. Assuming that the company will ultimately be able to produce five thousand tons a day, which would not be at all extraordinary, and that the average net profit will be $2.00 per ton, it will be able to pay upon its total capital stock of $5,000,000 dividends of 80 per cent. annually; or on a basis of four thousand tons per day, 72 per cent.

These figures might be considered chimerical. I do not vouch for their verification in actual results. They are certainly more or less confusing to the mind; and yet they are duplicated and even surpassed by the history of many mines, gold, silver, copper and coal, in other parts of the country. That such an immense source of wealth should lie fallow for so many years in the face and eyes of this region's necessity for cheap fuel is astonishing to say the least. One of two things is certain—either all the signs are deceptive, or else this new enterprise is bound to prove of a magnitude hitherto undreamed of in the industrial annals of New England.

BUSY PREPARING IN PITTSBURG FOR ITS WORLD'S SERIES

BOSTON AMERICAN SPORTS

WINDUP OF NAPS AND RED SOX SERIES TO-DAY

ALL READY IN PITTSBURG FOR THE PENNANT

PITTSBURG, Sept. 23.—Yes, they are all ready for the pennant down here. Already hundreds of rooms have been rationally engaged for the big battles, scores of extra wires to carry the story of the games to the afternoon newspapers have been stretched to Forbes Field.

Accommodations have been arranged for 150 newspaper men and eighty telegraph operators. And it will be possible to take care of nearly 30,000 people without seriously encroaching on the players' field, and nothing like the overcrowding that has been suffered in former world's series.

Here in Pittsburg they root for the Athletics as against the Tigers with even greater enthusiasm than they do in Cleveland. The fans here say that it is state pride. Perhaps it is, but some outsiders are inkled enough to remark that Connie Mack's boys are not regarded as quite so formidable as are the American League champions led by Hughey Jennings.

The result that would have pleased the Pittsburg fans more than anything else would have been to have the Naps win the pennant in Ban Johnson's league. This was the unanimous sentiment here.

Some of the fans have recall a trip they made to Cleveland in 1901. Pittsburg and Cleveland were having a great race for the National League pennant. A three-game series was scheduled to be played between the two clubs at Cleveland, and the Pittsburg people wired over to Secretary Dash Hayley: "Reserve us seats for Thursday's game." Hayley reserved them, and 1,800 Pittsburg fans came on two special trains.

Thursday Pittsburg won the game against old Cy Young. The 1,800 Pittsburg fans decided to stay over another day. Friday the Pirates won a game off Handsome John Clarkson. Orders then were issued to hold the two special trains in the yards till Saturday night. Saturday the Pirates took a lusty fall out of George Cuppy.

Then the 1,800 or more Pittsburg fans went home, but their yelling, shrieking and howling could be heard long after the two specials had passed Hudson.

STATE GOLF TEAM PICKED

The official make-up of the Massachusetts team of golfers, which is to go to Providence to-morrow for the annual interstate match with Rhode Island at the Agawam Hunt Club, Saturday, shows that the Bay State will be represented by its strongest team of players in the history of these matches.

There will be ten singles matches in the forenoon and five foursomes in the afternoon. The executive committee of the State association yesterday announced this team:

H. H. Wilder, captain, Vesper; Percival Gilbert, Brae-Burn, the State amateur champion; John G. Anderson, Oakland; Jesse A. Vogel, Essex County Club; Hugo J. Johnstone, Woods; F. M. Curtis, Wollaston; Arthur H. Rotch, Allerton; Charles White, Brae-Burn; H. Hot. Adams, C. Crocker, Jr., Algonquin; R. R. Freeman, Wollaston, and others. H. H. Trickey, Oakley; W. W. Clark, Brae-Burn.

There may be one or two changes in the make-up of the Rhode Island team; but, according to the officials of that association, this team will play: W. Tucker Hall, H. B. Rose, H. Congdon, C. H. Gardner, H. E. Kemptey, A. S. Vesper, Coaches; Sheard, Jr., W. Clark, F. B. Lavis and H. D. Wilder.

The Massachusetts team has also been pretty much determined on for the Valley cup matches to be played at the Hamilton Valley Country Club, near Philadelphia, Friday, October 1, and it is: H. H. Wilder, captain; F. Gilbert, J. G. Anderson, P. W. Whittemore, H. R. Johnstone, T. M. Claflin, A. G. Rockwood and W. C. Chick. The two players and the substitutes will be selected this week.

LIKE RACE OF HUMAN ANTS—Read in the SUNDAY AMERICAN of the strange and wonderful discoveries in New Guinea.

MATTY WILL STICK, DECLARES M'GRAW

ST. LOUIS, Sept. 23.—The report that Matteson is going to quit the Giants is not bothering McGraw in the least.

"Matty will work in two or the games in Pittsburg," said the little leader this morning, "and for next season—well, I am just as positive we will pitch for the Giants as I am that I will again be manager."

WHITNEY'S HORSE WINS.

WINDSOR, Dept. Sept. 23.—H. P. Whitney's Delirium won the September handicap, $2,000, here today. Nine horses ran.

FARMERS FROM WEST TOURING NEW ENGLAND

By J. C. KERRISON.

The subject of good roads is being pretty freely discussed in this part of the present week. At Cleveland is being held the annual good roads convention, while in the East is a touring party of farmers of Arkansas, Louisiana, Oklahoma and Texas are making a tour through New Jersey, New York and New England. The men of the trip is to demonstrate to the Westerners what the East is doing in the way of good roads, and how they not only increase land values but double the farmers interests.

The latter tour is in charge of B. F. Yoakum of the Rock Island Frisco lines, and has been arranged for two months. Yesterday the party was in Philadelphia from which point it toured by train to New Jersey, where they will spend the of the road work in northern New Jersey is being made especial car will this evening carry the party to Albany, and at which point it will be met by automobiles and the city spent in touring in that section.

The fine roads of New Hampshire and Massachusetts will be thoroughly inspected, the party reaching Boston on Saturday, remaining here until Monday, when Providence will be visited and the trip went continued. The Massachusetts Highway Commission has been invited to meet the gentlemen from the West and there is no question but what good results will come from the great good the members of the party are G. A. Cole and M. E. Dickinson, Ark.; J. F. Harvey and J. N. Pelcoch Louisiana; Freeman R. Smith, J. F. Connors, Clark Hamilton and J. Hampton, Okla.; J. W. Thurman, Texas.

After having traveled about 2,000 miles in their overland runabout since July 17th, Dr. Tully, wife and son arrived in New York September 17th. During the two months they were on the road most of their nights were spent in tents. From the time they left St. Louis they carried about all the time, cooking their own meals, and in a word getting back as close to nature as was possible. With the little runabout heavily laden with camping paraphernalia, they left St. Louis with no other time schedule than to get to New York when it pleased them to do so, their only object being to have put as many miles as possible.

Some localities the roads were rather bad, making traveling over them in the heavily laden car at times rather slow. All kinds of weather they encountered, yet even these hardships on the car failed to bring out a break in any part of it or its mechanical parts. The machine carried was big enough for a tent, like the one of the Overland, but from the time Dr. Tully had absolutely no trouble with it.

LIVELY WORK BY PENN TEAMS

PHILADELPHIA, Sept. 23.—Surrounded by a crowd of interested spectators, the University of Pennsylvania football squad was put through a vigorous series of practice scrimmages yesterday afternoon.

Divided into two teams the players, prospective and otherwise, were drilled in signaling, punting and tackling. Coaches Mulford, Scarlett, Torrey, Banker and Meade directed their movements. Especial attention was paid to kicking. Captain Miller, Hutchinson, Thorpe and Wharton were given special attention in punting.

A number of shifts were made in the back field positions. Marks and McIntyre both being tried out as fullbacks.

JOHNSON IS 2 TO 1 CHOICE

SAN FRANCISCO, Sept. 23.—With Stanley Ketchel, middleweight champion of the world, to begin work for his fight with Johnson, betting on the contest is beginning to boom. The recent poor showing of Ketchel against Papke, and the ease with which Johnson beat Jeffries, was caused Johnson to be a pronounced favorite, and all of the Johnson followers. Several large wagers were made yesterday at 2 to 1 that the negro would defeat Ketchel.

B. A. A. GAMES FEB. 12.

The Boston Athletic Association announces that the 21st annual indoor handicap indoor track games will be held in Mechanics Hall Saturday night, Feb. 12, 1910.

ADMIRAL DEWEY A SIRE.

Nancy Hanks, 2.04, now has a producing sire of speed in Admiral Dewey, 2.04½, that is represented this year for the first time in the lists of sires. He is the sire of Sciotta (4), 2.22¼, and Jack Admiral (3), 2.22½.

READY FOR THE LONG, DESOLATE NIGHT

BASEBALL NEWS AND NOTES

Jim McGuire is trying out nine youngsters on the present trip of the Naps. Next Spring he will give chances to fourteen more. The Naps' leader entertains a high opinion of Noted, who is now covering third base, backed by a youngster with great promise, says McGuire.

Donee, the Naps' pitching recruit, hails from Peoria, Ill. McGuire picked him up in the Three-Eyed League, where he made some dingers look unusually foolish.

Keeler's hitting is getting better as the season grows older. If Wee Willie had another month to play he would surely reach the .300 circle, traveling at his present clip.

This may be Birdie Cree's last season in professional ball. At the close of the season, Cree will return to Troy, State and resume his position as instructor in drawing. If he decides to quit the diamond it will be because he makes a decision to enter the government service.

The New York Americans have only slightly improved their percentage over last year's figures. They were last then.

Eddie Pickering, the old pitcher, hasn't done much for Minneapolis this year and it is not expected he will be back there again next season.

Brooklyn paid $1,200 to the Chattanooga club for Second Baseman Forbes Alcock.

Billy Friel is touted as the likely successor to Billy Chappel as manager of the Columbus team.

The season's series between New York and Chicago stands 11 to 10 in favor of the visitors.

Jimmy Austin has not been at all well with Jim McGuire, who says the Michigan infielder has all kinds of ambition.

Strange how all other teams in the league go to pieces before Rochester and play like fiends against Newark.

Wheeling Central League champions did what the National League clubs have been trying to do for years—they won a championship. Pittsburg Journal remarks: "They only beat Fred Clarke's team 3 to 1. Huh!"

In other opinions leaders of the Chicago Cubs are not so sure that the pennant is Pittsburg's final task. But in Kansas City Johnny Kling says with all confidence that the Pittsburgers will struggle games on Chicago's grounds when Johnny Evers is back in the box.

Baltimore players are mobbed at Augusta, the darling to win on the latter's own grounds. The deciding game for the championship between Cobb feared for his life here. Tyrus Raymond Cobb's home town that the mobbing of a Northerner is May the best club win.

Now the Athletics the fastest outfielders and base runners put together a most powerful combination.

Joe Keller's Marble Leafs, fresh from conquests of Kansas, took on the Kansas City Blue Jays in a series of three games in the Kansaseed gridiron city, and the Leafs won two out of three. Keller's men are reported that every local baseball wight is beginning to boom. The recent poor showing of Ketchel against Papke, and the ease with which Johnson beat Jeffries, was caused Johnson to be a pronounced favorite, and all of the Johnson followers. Several large wagers were made yesterday at 2 to 1 that the negro would defeat Ketchel.

Manager Bresnahan of the Cubs has been in receipt of a letter from Jack Coombs, the Athletics' star pitcher, who is now in Europe, in which Coombs declares that he will be back in the States in time to report to Bresnahan next Spring. Coombs says that he has had a fine time since he left the States, and that he has been in good health all the time. He says that he has been in good health all the time. He says that he has been in good health all the time.

Jack Keller's Marble Leafs, fresh from conquests of Kansas, took on the Kansas City Blue Jays in a series of three games in the Kansaseed gridiron city, and the Leafs won two out of three. Keller's men are reported that every local baseball wight is beginning to boom.

Chicago has placed on the Princeton coaching staff Dr. Hollis, who is said to be a star. He is likely to give Yale a few slippers in his day before he is through.

Over forty men have reported to Coach Mathewson at Princeton. Practice began on the new Prospect Park and the training school already has the look of a place where one is to make it or go and belated property.

Howard Jones is evidently going to make a strong bid for the coaching job at Yale. He has not only gone to New Haven to see the game himself but he caused Sam Fox to journey to Illinois to see the game. Jones will be on hand next year ready to offer his services to order.

The University of Illinois is getting in some good work on the new field. Coach Jones has put the gridiron crank that burned early practice the past season and the men are making up for lost time. Every man is making an effort to get into good shape and the prospects are bright.

While Yale is worrying about her quarterback problem, Harvard has Steve Philbin, who is apparently at it in the matters of ball general ship. Philbin is a star. He is a star. He is a star. He is a star. He is a star. He is a star.

Here is the announcement of Coach Haughton's plans as building up a good team. He

CLUB PROMOTERS STOPPED KETCHEL-LANGFORD BOUT

Mutt Gathered Yesterday and Is After More Inside "Info" Today—By Bud Fisher

NEW YORK A. C. HOPES TO WIN GARDEN MEET

NEW YORK, Sept. 25.—The New York Athletic Club is feeling somewhat sore over the result of the games on Saturday, when the Irish-American Athletic Club won easily, and the athletes are all trailing hard for the indoor championships on October 4 and 5 at Madison Square Garden, when they expect to turn the tables on the Winged Fist contingent, as conditions will be different. Lawson Robertson, the trainer of the Irish-Americans, however, looks for a repetition of Saturday's results.

The features of these championships will be the 600 and 1,000 yard races. Sheppard, Lungbi, Kiviat, Hillman and Gissing will start in these events, and it is a toss up as to who will win.

Gissing is a dangerous man at any time and the New York Athletic Club followers are depending on him to win the 1,000-yard event.

Lungbi is a marvel at any distance, from 400 to 1,000 yards, and many claim he can smash all records between these two distances.

Hillman, when trained for a 600-yard race, has never yet met his equal.

Kiviat is a wonder for his age. Although only a schoolboy, he has traveled close to record time on several occasions. He is a most consistent performer and a good race is always assured when he starts.

These five men are undoubtedly the fast-est in the world to-day in their class, and it will be many a day before such a select field faces the start.

In the two-mile race, George Bonhag, the record holder, will toe the mark with Wilcox, the English champion; Sullivan, Daly, Tobin, Bellars, Bailey and other well-known distance men. Bonhag has been resting up all Summer, but is in training for these games, and if he reaches the form he was in last Winter he will surely be the champion.

TRUTH ABOUT THE NOTABLE HARDSCRABBLE SEPARATION—This romantic domestic tragedy will be printed in detail in the SUNDAY

KETCHEL TO GO ABROAD FOR FIGHTS

NEW YORK, Sept. 25.—Assassin Ketchel will display his wares before the British aristocracy, whether he wins, loses or draws with big Jack Johnson on October 12 at Colma. Willus Britt announces that he will take his charge across the pond and show the Londoners what a real fighter looks like. Willus will make a tour of the Continent that will take in Ireland, Wales, France and even Denmark, if he hears the least sign from the call of the wild. Copenhagen is going to let up" over the game since her two mighty sons, Battling Oscar Nelson and Fighting Dick Nelson made good in America. Britt says not a word about Langford.

We hope that they "Bill" hasn't given the Boston demon the goby. Sam must be reckoned with, or else Ketchel will be accused of having too much respect for Langford's particular style of battle. Ketchel has sold, however, that he will never fight Langford if he wins from Johnson during Portola Week.

Ketchel, like a great many of the big guns in Indiana, abhors the fact that a negro ever got the chance to win the title. John L. Sullivan was the last man made that barrier popular. In his day a black man had no standing with a heavyweight champion. That was John L.'s pet idea, and he never limited over the traces, perhaps saving himself a whipping at the hands of that wonderful black warrior, Peter Jackson, who visited Indianapolis on Peter's behalf.

Things have changed a bit since the Boston boy was the daddy of the big fellows. There were too many good fighters like Dixon, Gans, Walcott stripe following upon John L.'s heels. These three boys, all colored, held dominion, feather, lightweight, middleweight and even the heavyweight championship within their grasp. Little Walcott, standing but five feet, one, created the scare of the big fellows, but was never given the chance to win the real heavyweight title. It is doubtful if that situation will ever again be seen itself again. If the handwriting on the wall is correct, KETCHEL WINS." Burn Sam must consider Langford.

Sam is too good a fighter to be tossed into the discard. The title belongs to the man who is the class of the boys, though what oh! only only! poly Jacob L. might have thought of it.

STRAIGHT DOPE

FOR SPORT FANS

AN OFFICIAL OF THE ARMORY Club was asked after the Sullivan-Martin joke fight when Mike would box at that club again. His answer was the question:

"Let's see, when did Mike box here last? Oh, about five years ago," was the answer.

P. S.—Mike says he broke a bone in his hand in the second round, but up to date he has not decided whether it is the nine bone or the magnum. I don't know that he has wired to Willus Britt to find out, but the foxy westerner can put him wise from almost any distance.

JOE WOOD, THAT TWENTY-YEAR old twirler Fred Lake garnered from the American Association, gave the fans another flash of class yesterday when he held the heavy hitting Indians down to five hits, for only one run. Not only does Wood deliver the goods in the shape of his stuff, but for a few years of the old-timers have anything on him in the matter of fielding his position, or using that gray matter when an emergency arises. Mark these prophetic words: If no accident happens Joe will be one of the shining stars of the baseball world next year.

TAKE IT FROM ME THAT YOU WILL be disappointed if you are expecting another Attell-O'Toole or Sullivan-Martin fiasco when Sam Langford and the Dixie Kid get into the ring at the Armory next Tuesday night. The Dixie Kid has gained no cheer in the hall of fame but several fight fans who have seen him at work tell me that he is a fighter of no mean ability and that he is busy every minute he is in the ring. Which is contrary to say about the thing about Ike the Sam, and if the Kid is as good as they tell me he is, the bout will furnish sport enough to make up for the last two main bouts.

HOW MANY OF YOU BASEBALL dopes would reserve accommodations at the Bonis corral if you had a baseball race on here like the one they are having in the American Association? Louisville, Minneapolis and Minneapolis are fighting for the pennant and the leadership has changed on an average of twice a week for the past month or more, each of the three teams getting a crack at it. In addition to this St. Paul and Indianapolis are scrapping it out but a few points behind, and only about a hundred points have separated the eight teams of the league for the major part of the season. Must be pretty hard on the nerves of the fans.

I SEE BY SEVERAL OF THE NEW York papers that Charley White, who refereed one of the Armory A. A. shows recently, has been appointed official referee of the Empire Street club. This was news to me and undoubtedly will be to the officials of the Armory. Dick Fleming worked Tuesday night, and herbal the little roughness in breaking the boys in clinches, looked pretty good to me. Charley White is a good referee but we don't need him over here. By the way, White as a referee is about the only thing in the boxing line that I can recall New York producing since Terry McGovern's time. Most of the fighters they send over here are a lot of bums.

PRESIDENT CHARLES W. MURPHY of the World's Champion Cubs declares that he will make a fight before the magnates of the National League at their Winter meeting for a "School for Umpires." When he needed a good deal worse is a "school for magnates," and I'm voting for Murphy to be one of the first pupils.

SOMERVILLE H. MEETS TUFTS

The first practice on the Broadway Athletic grounds for Somerville High was very stiff, and when the team meets Tufts to-day the schoolboys hope to make a much better showing than they did in the opening game with Everett last Saturday. Mechanic Arts High will be Somerville's opponent at Somerville next Saturday.

Milton High will be the attraction for the academy on the latter's grounds next Wednesday afternoon in the opening game. Copley, Latin, Mass. St. George's and Noble & Greenough will also be opponents for Milton this year. H. Grilwood announces the following schedule:

September 29—Milton High at Milton.
October 2—Noble & Greenough at Milton.
October 5—Copley at Milton.
October 10—Roxbury Latin at Milton.
October 20—Somerville at Somerville.
October 29—St. George's School at Newport, R. I.
November 2—Mass. Institute of Technology at Milton.
November 13—Open.

WILL GET IN YEAR BOOK.

Every pacing stallion with a record faster than 2:08¾ will be represented in the table of sires in the 1909 Year Book, as well as every trotting stallion with a record better than 2:05.

GOLF GOSSIP

NEWS OF THE LINKS

Massachusetts golfers in general are looking forward with a great deal of interest to the Summit Invitational, given by the Ross brothers, Scotchmen who are in charge of Blue Hills and Oakley, versus two American homebred "pros," in H. L. Nassiff of Wollaston and W. J. Brady of Tedesco and Commonwealth. Wednesday and Saturday, September 29, is the date set, and the match will be played over the Blue Hills links.

The men holes at the Country club, that many of the Boston golfers have viewed with in their process of construction from the time that the land that is now the Brookline fairgrown, was a rough swamp, will leave an opportunity to play over them for October when the annual Fall meeting is held, or the Autumn handicap tournament and amateur meeting on October 10.

Charles Burgess, the professional at the Westford Golf Club, recently made the long adrift hole on his course in one. This hole has only been made in this league once or twice in the history of the country, so only a very long player can reach the green from the tee. Burgess is a dead on the line and must enough the hole to drive.

Dr. R. E. Sproule of the Wollaston golf club will probably be one of the starters in the second R. I. golf championship that comes off at Wollaston next week. He won the title last year and should prove a hard man to depose this season.

GOING TO KENTUCKY TROTS?

A special car will convey a party of Nea England horsemen to the Lexington trots. Parties wishing to secure reservations in the car can leave particulars by addressing the American Horse Breeder. It would be well to apply at once, as there are only a few vacancies left.

TRAINING ELASTIC POINTER

Elastic Pointer, 2.04½, the blind bridled of Star Pointer, 1.59½, is in training again after a lay-up of about five years.

MILTON H. HAS FIVE VETERANS

Philip W. Cox, formerly of Malden High and Harvard, will coach the Milton High eleven, and Storey Sears, the hockey player, has been appointed manager. Five veterans are available in Irvine Carson, center; Ben O'Connell, right end; Harry Stuart, left end; Francis Maguire, quarterback, and Quigley, tackle. Alfred Shea is the captain. Whitemore, who played halfback for two seasons, is expected to return to school next week and report for the team.

Alfred Shea, end; W. Maguire and Sanger, halfbacks, have been shaping up nicely and from present indications they are likely to make the team.

The schedule:

Sept. 29—Milton High at Milton.
Oct. 2—Belmont High at Milton.
Oct. 9—Arlington High at Milton.
Oct. 16—Arlington High at Milton.
Oct. 23—Open.
Oct. 30—Arlington High at Milton.
Nov. 6—Open.
Nov. 13—Brookline High at Brookline.
Nov. 20—Open.
Nov. 25—Thanksgiving Day—Belmont High at Milton.

A WINNING MERRY WIDOW.

Merry Widow, the mare that won so many races on the ice the past winter in Canada and Northern New York, and that made the dirt racing season begin has been unbeaten, cut her mark to 2:06½ at Hartford, Wednesday. W. W. Safford-Trotter, She is in the stable of Jack Rombough who has in her a worthy successor to his other good winner, Le Point, 2.06¾.

THREE TODDS IN 2:10 LIST

Todd Mac, 2.07¾, makes the third 2:10 trotter to the credit of Todd, 2.14¾. The dead sire has three more on the way in Henry Storey 4, 2.09¾; Sir Todd, 2.11¾, and Wilkerson, 2.12½.

A SUNDAY AMERICAN want advt is often the road to fortune.

IRISH CHAMPION WRESTLER WINS

Pat Connolly of Galway, Ire., champion heavyweight wrestler of the British Isles, and good at the Columbia last night in his match with Jim Comstock, the Michigan giant, before the largest house of the season. That the capacity mob was out in force was attested by the ovations given Connolly at the end of each bout, but the outstanding fair-mindedness of Columbia wrestling fans was shown by the applause given Comstock whenever he scored a point or made a neat get-away.

While Comstock was the bigger and heavier of the two, Connolly was fast and wiry, and gave evidence of being the strongest man that has shown here for a long time, breaking by main strength many of the Michigan's best holds.

Connolly agrees to meet Paul Methot-Pete Nonnie, Charley Goldman and the winner of Comstock-Gallagan bout for the bantam championship of the East and will box a limited number of rounds, at Mechanics Athletic Club, Monday night, Oct. 4, Dr. Dennis Pete Noble, manager of the Colonial Amusement Company, announces that the Lawrence and Lowell fans have been offered inducements to trade at the Colonial Theatre, Lawrence, and the Merrimack Square Theatre, Lowell, this week. Each Kobbler agrees to get them so for twenty or thirty days. By this arrangement the bobbing around of the hub seats is to be done away with. Manager Noble has also announced that he will return to Boston's vaudeville fold only when he can secure the Majestic, Philly's most successful vaudeville house.

Bengtsen says that Goldman is the champion of Sweden, and is out to find at least one of the country, so that he can come to take part in the big show this month.

BOSTON AMERICANS DOUBLE

Our First Heroes

By BEATRICE FAIRFAX

I WONDER what the world would be if there no decreed that every girl married her first hero. Looking back on some of mine, I feel like grasping Fate by the hand and saying: "Good old Fate, you have saved me from many a mistake."

I remember one hero who lived next door. He sang tenor in the choir and I asked nothing better than to go to church every day and all day. I acted like a silly little girl, and would have been guilty of most foolish things if his mother had not kept her eyes on me.

The tenor was later convicted of forgery, and that put an abrupt end to that romance.

There were others, and each time I thought myself desperately, finally in love, and I considered my mother a cruel, unsympathetic woman because at first she either laughed at or failed to sympathize with my romances.

A Schooling of Love

Of one affair that began to seem really serious and was most undesirable she cured me by inviting the man frequently to the house and letting me see him in his true character, which was not that of a gentleman.

Every girl goes through like experiences. She falls in and out of love, or thinks she does, half a dozen times before the right man claims her heart.

And all through it the mother's heart is continually on the jump. She is so afraid that her girl may make a misstep and tie herself for life to the wrong man.

I don't suppose there is a girl in the world who does not at some time or other feel that her parents are monsters of injustice.

"What do they know about it?" her rebellious young heart cries. "I'm the one most concerned. I love this man and I know that he is worthy. Mother and father are narrow and prejudiced, that's all."

Wouldn't you hate to think that your judgment in most matters did not ripen and improve as you grew older? Why not of men as well as love important things?

The girl of eighteen simply cannot help being biased by looks, clothes and a smooth manner. She gives little thought to man's brain and much to the cut of his coat and his athletic powers. It is natural that she should feel that way—she is a mere baby where judgment is concerned, and is bound to plunge as she sees new of the world and the men that dwell therein.

Men Easily Spoiled

There is one thing that a girl learns as she grows older, and that is that while every man is willing to advise her he will tell her that she must not take the advice of other men. Is it because man knows his own kind, or because he likes to be a law himself, I wonder?

The best thing to do is like all men so far as you find them worthy; trust them, but trust your mother and the dictates of your own heart and common sense more.

The moment you begin to find yourself making a hero of a man pull yourself together and find out of what stuff your hero is made.

A man may be a hero to one woman and a mighty unsatisfactory husband to another, and the more hero-worship he receives the more unsatisfactory he is likely to be.

It is always women who spoil other women's husbands. It is easy to flatter a man's vanity if you don't have to live with it after it is aroused.

Go on with your hero-worship, honey; it has to be gone through with like measles, mumps and other juvenile diseases, but at the end of it all marry a man who is a real man, not a dummy.

Varied Opinions as to the Best Age for People to Marry

Hosts of BOSTON AMERICAN readers have said in their opinions as to the best age for a man or a girl to marry, in response to the articles written by Dorothy Dix and Beatrice Fairfax on that subject. Here are some of the letters:

MAKE A WISE CHOICE

Editor Magazine Page:

Dear Sir—Now what was said in your paper a few days ago in regard to early marriages of girls.

While I am only sixteen, I have only a narrow view of this subject, but still know this: That any girl who marries before she reaches the age of twenty-five has a head, is doing a risky and very foolish thing which, no doubt, she will regret two or three years later, if not sooner.

If girls could only be impressed of this fact, and wait until they were able to make a wise choice, and not go picking out a man who is unmanly and not being able to support himself, there would be more happy marriages.

My advice to girls, remain single as long as you can, you will be married long enough. K. H.

MEN FROM 22 TO 30

Editor Magazine Page:

Dear Sir—You ask at what age is a young man capable of making a good husband. My suggestion is from twenty-two to thirty years old, and from that time on a man knows his own mind as to his ability of keeping his head level.

WILLIAM FLOOD.

FICKLE WHEN UNDER 25

Editor Magazine Page:

Dear Sir—Reading your question as to what age a young man is to marry, I say that a young man should not marry unless he is above twenty-five years, as he is fickle-minded, going out with boys, comes in contact with different girls, and sees face, now fancy, until he fully realizes to select a plain, every-day girl for his life partner, as that is usually kind of a girl that will make a man happy, especially for a plain business man, who wants to have a tidy home and meals ready. F. S.

LIKES MEN OF TWENTY-FIVE

Editor Magazine Page:

Dear Sir—Replying to your inquiry as to what age a man is most likely to make a suitable marriage, also a most desirable husband, will say I think it depends largely upon the young man's disposition as well as his commercial prospects.

Some young fellow may be settled at twenty-five years, while another never. Nevertheless, I believe the average man would do well to tarry until he reaches the age of twenty-five. At that age he is usually settled to be considering our fair capitalists.

M. L. M.

PICKS 17 AS GIRLS' AGE

Editor Magazine Page:

Dear Sir—At what time of life should people marry? Some say twenty-one, some twenty-four, some twenty-five, and when the woman is sixteen or seventeen and more.

Marriages are 1,000 times more likely to be happy when entered about the time of twenty. Old people are not lovely. Like one dog and a middle-aged one. But young folk is certainly lovely. Nothing more than thirty is cold, one may get married young, but for good results don't wait for your future wife over seventeen years.

There are a great many different things to be said on the cycle of people who marry young and old, but I think that young people wait to get married, either on the other hand, or both, at either end of the cycle.

Young folk are married from twenty-four to twenty-seven. Young women don't go beyond twenty-five, and young men don't care what they marry so long as she's the right one. PADDY.

He'll Be Wise, Next Time

By KENNETT HARRIS

INO that I have been a-sheddin' tears—
I ges I've shed as menny as I cood shed;
An so wood you if summun grabd or ears
An lamb you to a finish in the wood shed.
Mi Par did that. Ses he, "yoo no what for.
Wot was it?" an he lamb me till I cride out
An sed I wodent do it enny moar.
Ide cum home an mi hare it hadn't dried out.

I'll no enuf the nex time, yoo can bet,
Not too cum rite strate home an get a trimmin'
The way I did, bekos mi hare was wet.
He dri it good whenever I go swimmin,
Ses Par: "He learn yoo suthin', yoo young scamp."
He did—that it amounts too an admishun
To let a patrunt feal yor hare is damp.
An that yoore seldom licked upon supishon.

Sum boys I no gose lan moast erry day
An' has a bully time, an' fokes beleeves em
Bekos they never giv thareselves away.
Fokes alwis likes the fellers wot deceeves em.
My Par is pretty good sumtimes too me
Butt his cumpashun hasunt gott no bowels;
An' so the nex time I will shorely see
That some of us has took along the towels.

A Word on Smoking

By ELLA WHEELER WILCOX

A GENTLE little lady asked me recently to write a word of appeal to men about the smoking habit. She did not expect me to stop the use of the weed because she disliked the odor of tobacco, but she hoped a few of them might be a little more thoughtful about when and where they indulged in the habit.

Tobacco smoke renders some women ill, even when they have no objection to the weed from a moral or social standpoint.

I have known a number of such women, and I have heard men ask the conventional "I hope you do not object to smoking," and I have seen women hesitate and reply "Oh, no, certainly not," rather than seem narrow or unsocial and deny the man a pleasure, yet they have grown pale and looked distressed as soon as the fumes of the cigar reached them.

Few Know How to Breathe

If the man does not know a woman's taste in this matter he should not smoke in her presence or suggest so doing, unless she first gives him permission, unsolicited.

In a cafe where smoking is allowed, or in a car, where ladies cannot find retirement, the really refined man will seek to avoid blowing his cigar smoke in feminine faces, while he may not forego the pleasure of his weed.

There is always a way to be considerate and unobtrusive in such a matter, whatever the situation, and there is also a way to be offensive and disgusting.

I believe most women try to be liberal and broad in this respect, and I fear few men think enough about it to be very delicate in the acceptance of woman's liberality.

Few women know how to breathe, and for this reason they are really more or less sensitive to the influence of odors than men are.

Children's lungs and digestive organs are often seriously affected by the too early inhalation of tobacco smoke, blown into their helpless faces by loving and thoughtless fathers and brothers.

Don't Forget Consideration.

Try to take an unselfish view of this matter, dear sir.

When your wife or sweetheart wants you to sit with her and enjoy your cigar, do it, but do not suppose because she enjoys it that every woman you encounter is pleased to have your cigar smoke puffed in her face; and do not forget to be a refined and considerate gentleman, even in a public cafe or open car where smoking is allowed.

THE LOVE CURE--FOR MEN--By DOROTHY DIX

WHAT is the beginning of the love is enough to cure the most violent case of love sickness in any man.

cure for a man who has appointed himself to be hopelessly smitten with a woman?

An overdose of devotion.

This would, usually, work before and after marriage. It is one of the peculiarities of the masculine system that it is by sentiment, and that the only way in which love can be satisfied for it with a loppy and lasting effect is in small and broken doses.

It was a man who exclaimed, "Stay me with flagons and feed me with apples, for I am SICK of love." These are still the sentiments of the coffee man, only now, and there is no other way so quickly and effectively to make a man fall out of love as for a woman to fall too sloppy in love with him.

It is an axiom of domestic life that the more indifferent the wife the more devoted the husband. There is something in the touch of adoration with which a bride surrounds her husband that just naturally sloys on his nerves.

It's like living in a candy shop. It makes him lose his taste for sweets.

The Change at the Alter

The next step in the love cure is when a bride begins to quit, as he often does, that the woman he has married is no more like the woman he thought he was marrying than the bride had been changed to the bride. His thought that he was marrying a manifest young creature with golden locks, a peaches and cream complexion, and with a sweet, submissive, gentle little nature. He finds that the lady he has espoused removes her complexion and her hair at night, and that, over her youthful disposition only, they have company. At other times she is narrow and prejudiced and hard and mean, and just one dose of her real self is enough to cure the most violent case of human nature, and especially masculine nature, to be aware that the marriage ceremony reverses the order of procedure, and that the wife who loves her husband interested has to be a painstaking and continuous performance. Intense horror prevails. Many a man's affection for his wife drops from fever heat to below normal just because she doesn't keep it stimulated enough to flatter.

Still another love cure that never fails is complaining. The woman who howls and whines because she has to keep house and take care of children and fulfil the ordinary domestic duties of life, and who is always throwing it up to her husband that she can't have automobiles and diamonds as some millionaire's wife has, doesn't even walk for love to die a natural death. She hastens its end.

Nagging is likewise a good reliable cure for love. True affection will stand many things, but not a woman's eternal harping on a single string.

There are men who have taken back unfaithful wives, men who have spent their lives and fortunes keeping dishonest wives out of jail, men who have gone to the very foot of the gallows with wives who have committed murders loving them still, but no man's love ever withstood the wear of a nagging wife.

"Duty" Most Efficacious.

A woman's eternal, "I told you so," and "What made you do it?" slay love so effectually that there is not enough left upon which to hold an inquest.

Perhaps, though, there is no deadlier love potion than the fatality that so many women have of making home and matrimony synonymous with duty. Heaven knows how, but they manage to endlessly every particle of romance, of spontaneity, of pleasure, out of the life that unfortunate men have undertaken to live with them.

They make home a place of penance where everything that the man wants to do, he is forbidden to do. It is austere, a place of desiccated breakfast foods, and preclusions, and arguments and recriminations—a place that sends a man's spirits down and his temper up when he puts his hatch key into the door.

The wife drops the coquetry and charms with which she captured the man's fancy, and develops into one of these impossible creatures who can never meet a man's mood, and are no more companionable than a wooden clothes horse.

"It's like living in a candy shop."

"Nagging is a reli able cure for love."

Love's Pleading

By MARY E. HEWITT

SPEAK tender words, my own beloved, to me!
Thou'rt the pure lily—thy imperial one,
That, like the Persian, breathes adorningly
Its fragrant worship ever to the sun.

Speak tender words, lest doubt with me prevails;
Call me thy rose—thy queen rose! Crowned queen,
That, all unheeded of the nightingale,
Holds close the dew within her burning heart.

For thou'rt the sun that makes my heaven fair.
Thy love, the blest dew that sustains me here;
And like the plant that hath its root in air,
I only live within thy atmosphere.

Look at me with those soul-illumined eyes,
And murmur low in love's entrancing tone—
Methinks the angel-hute of paradise
Had never voice so thrilling as thine own!

Say I am dearer to thee than renown,
My pride—more treasured than the world's acclaim;
Call me thy laurel—the victorious crown,
Wreathed in unfading glory round thy name.

Breathe low to me each pure, enraptured thought,
While thus thy arms my trusting heart encircle;
Call me by all fond meanings love hath wrought
But, oh, loathis ever call me thine!

To-Day's Best Story

Very suggestive is the story of the New Jersey man who felt that he had at last invented a process for manufacturing eggs. He experimented until he discovered the component parts of a natural egg—the milk, fibrin, phosphorus, and all of the rest—and hastened to secure them. Then he announced to the druggist whom he patronized for his chemicals that all he needed now to insure success was a cold weather, when eggs would sell for 50 and 60 cents a dozen. December saw the hoard for potted eggs, and both the inventor's new cooper kettle was set over the flame of the kitchen gas range; the mixture was poured in it and the scientist proceeded to operate with a blowpipe. The fibrin, the phosphorus and the rest of the chemicals stood it as long as they could, and then spread their feelings in a mighty explosion—the neighbors sought their cellars, while the glass in windows and doors fell to splinters.

Discussing his failure with the druggist and other friends, among them Congressman Gardner of New Jersey, the puzzled alchemist said for the tenth time:

"Perhaps I forgot to include some essential in my formula."

"Yes," said Mr. Gardner, dryly, "you did forget something."

"And do you know what it was?" eagerly queried the experimenter.

"I certainly do," said the Congressman, "it was—tell me what it is and for-tune will be assured to us both."

"A hen, just a common, ordinary hen," replied the Congressman from Egg Harbor, unfeelingly.

BEAUTY GIVEN FREE—Mme. Cavallieri will give to the SUNDAY AMERICAN A page of the most valuable knowledge ever presented to women.

Advice to the Lovelorn

By BEATRICE FAIRFAX

AN UNCERTAIN PROSPECT

DEAR MISS FAIRFAX:

I have been going with a gentleman for the last two years. We have been very happy and enjoying each other's company, until I interfered him for a girl friend of mine. I esteemed as one of my dearest friends. She is a young lady, is educated by her folks and never fails to call on me flowers or anything of the kind. I showed this mail a short time ago. While I was out to see the girl, and he being away at the same time, he made me a present by sending me a letter in the envelope addressed to me, in which he expressed his desire of seeing her, that he missed her very much, etc., signing his first name to same. Naturally, when I returned I was reminded an explanation, asked him why he did not tell of this before. He replied, "What I did not know would not bother me." I have been informed, and know it to be true, that she calls on him by telephone at his boarding house. I spoke to him about this, but he told me in a very polite way to mind my own business; that he was free to speak to whomever he saw fit.

Since I have been going with this gentleman I never received him by some out with other men, although I have had many chances. I feel as though he is doing wrong to me, as certainly not a friend to you, and you had better have nothing to do with her. If you were my sister I would advise you to break with a man whose prospects were so uncertain and who treated her as he is treating you.

ALL RIGHT

DEAR MISS FAIRFAX:

I have been acquainted with a young lady for some time; in fact, we have been quite friendly, although I have never invited her out or called on her. I dearly love her and would be delighted to call on her at her home. Would it be impolite to ask permission? H.

[H] girl may be shy and that is the reason why she has not invited you to call. Tell her that you are anxious to meet her people and that you would like very much to call on her if she is willing.

CHASE & SANBORN'S HIGH GRADE TEAS & COFFEES

THE TALE OF A PTOMAINE

By JAMES J. MONTAGUE.

A LITTLE blackguard ptomaine crept beneath the door one night.
Observed that all the household slept, and hid himself from sight.
Within a sooty frying pan he found himself a lair.
And calmly set him down to plan his horrid murder there.
But when the cook scraped out the spoil with rosy suds, thick and strong,
The base, though nefariously, brute was forced to move along.

But still upon malevolence and dark destruction bent
The ptomaine, with his jaws set tense, a hurried movement spent
In picking out a place to go, and then, with kindling eye,
He climbed the table to bestow his person on a fly.
The fly, as is the habit of his predatory ilk,
Proceeded to alight above the morning's pan of milk.

But here the ptomaine's evil wit ag ain was rudely foiled.
Before the children drank of it the milk was nicely boiled:
And he perforce must shift his base and field of operation.
Or ever afterward efface his cosmos from creation.
And one he settled on a steak that lay upon the grill,
Resolved to make somebody quake beneath his wicked will.

But, as the breakfast was not served until completely done,
The ptomaine, by the heat unnerved, was soon compelled to run.
To wedge his carcass to beneath a slice of bread he tried;
They toasted it; he gnashed his teeth, turned up his toes, and died.
The ptomaine is a ruthless wretch, but he can never hope
To fight for a protracted stretch with cookery and soap.

HOME MAGAZINE PAGE

Society Plans a Greeting to Autumn Brides

By ELIZABETH ELLIOTT.

Engagement announcements are, just at present, the one and only cause of any social excitement. Every day two or three are positively made known and three or four are "authoritatively" rumored, so we know that Cupid is tending strictly to business.

It is too early for Autumn weddings, but October and November will this year break the records for those happy events. All of which is highly satisfactory to the engaged couples, their proud parents and relatives, and incidentally to the charming bevy of debutantes who are more than glad to see all the older girls married and out of the way.

* * *

Speaking of engagements, the latest one to interest Boston society is that announced from Paris by Mrs. Frederick Herrick, formerly of this city, of her daughter, Miss Ethel Herrick, to Wellesley S. Tuft of New York, a nephew of President Taft. Miss Herrick, who is very young and very pretty, has been living in Paris with her mother for some time and has been seen in Boston of late years only when making her annual visit to relatives here. Mr. Tuft is a son of Mr. and Mrs. Henry Waters Tuft of No. 58 West Forty-eighth street and was graduated from Yale in 1907. He is now a student at the Harvard Law School.

* * *

Each incoming steamer from Europe brings its quota of fashionables regarding from their travels abroad in ample time to get rested and refreshed for the busy social season so close at hand, and to shake out and put in readiness the duds and finery picked up on the other side, with the various events of the coming Winter at home in mind. Among the fashionables on the ocean homeward bound are Mrs. Charles E. Mason and her daughter Carrie, who left their Manchester villa early in June and crossed to join Charles A. Mason, Jr., and his pretty bride, Miss Paul, who were touring through Europe on their honeymoon. The Munns will go to their Manchester estate immediately upon arrival here and will not open their Washington home until December.

* * *

Returning on the Saxonia are Mrs. Ethel B. Dunckley, Master William Sands Dunckley and Mrs. Dunckley's mother and sister, Mrs. William H. Sands and Miss Elizabeth Sands. They have been abroad the entire Summer, motoring extensively through Europe and visiting the larger cities. Immediately upon their arrival they will open their respective homes in Brookline.

* * *

Mrs. Edward Payson Tingey and Mrs. E. C. Gregory have returned from the White Mountains, where they have spent the entire Summer.

* * *

All Essex society gathered at the Asquam Hill Golf Club on Friday night for the musicale given by Miss Helen Campbell of Springfield, soprano, and Miss Ruth Sanders, pianist. Robert Lowden, accompanist, the Novel Club, and the Asquam Hill Golf Club. Among the patronesses were Mrs. Joseph B. Bertolet, Mrs. Frederick Sloane, Mrs. George Westinghouse, Mrs. Henry P. Hagen, Mrs. Frederick Shaw, Mrs. Richard T. Dixey and Mrs. S. Barnes.

* * *

Chandler Robbins is now among those entertaining at dinner last night at the Curtis Hotel in Lenox.

* * *

The summer cottage of Cyrus Pelton Bingham, was all daily postponed on the morning of the great wedding, when the bride was Margaret Mary Smith, daughter of Felix Smith of Scituate, and the groom was Francis Houlton Appleton, son of Mr. and Mrs. C. A. Coleman of Beverly Farms. The bridesmaids were Miss Grace Lee Smith, Miss Elizabeth A. Pfaus and Miss Margaret J. Cotter of Hartford, Conn. Colman, brother of the groom, was best man. The ushers were Charles Appleton, Sherburn, H. Parker Whittington and Charles H. Smith, Felix Smith, Jr., brothers of the bride.

The scene of the marriage ceremony was St. Paul's Church, Hingham. Rev. Father McKenna was the celebrant of the nuptial mass.

The bridal gown was of white Empire satin, hand-embroidered. The bride carried a shower bouquet of lilies of the valley and wore as her only ornament a heart of pearls and diamonds, the gift of the groom. The matron, Mrs. Coakley, wore white Irish lace, and her hat was of cloth of gold with yellow plumes. She carried yellow nasturtiums. The bridesmaids were dainty gowns of blue with white marguerites.

A wedding breakfast was served at the bride's cottage at Crow Point. In the evening the Coleman and Smith cottages on the connecting lawns were brilliantly decorated for the event.

The couple left for the Alaska Yukon Exposition at Seattle. They will also spend a fortnight with Mr. and Mrs. Thomas Wilfred Coakley.

* * *

Invitations are out for the private address to be given by Mrs. Annie Besant, international president of the Theosophical Society, at No. 20 Chestnut street, during her visit to Boston, September 27-28. She will be the guest of Mrs. W. H. Partridge at No. 63 Westland avenue, who will also give two public lectures at Jordan Hall.

Dr. Robert Means Lawrence of 167 Marlboro and E. Pierson Beebe of Beacon street are among those who are sleeping at the Curtis Hotel.

* * *

Mr. and Mrs. Walter Pappin (Laura Carpenter) are to make their home in Lawrence and will be at home after November first.

The engagement of Miss Caroline Lowell Stockbridge last week and her reunion with Mr. Austen Colgate Barrett at the Professional Women's Club cabin on the Alaska Yukon Exposition, as guest of honor

MISSIONARY DIES AFTER 21 DAYS IN BOAT

VICTORIA, B. C., Sept. 22.—Further details regarding the loss of the missionary yacht Hiram Bingham, one of the fleet operated by the American Board of Commissioners for foreign missions, were brought here today by the steamship Iaonagi, from Australian ports. The Bingham was capsized at Jaluit, in the Marshall group. The captain, Rev. T. Walkup, a missionary, perished from exposure. The survivors were rescued by the steamship Iaonagi and landed at Sydney. The Hiram Bingham, a motor schooner, was bound from Butaritari with Rev. Dr. Walkup, eight Gilbert Islanders and a native crew on board.

For twenty-one days the castaways drifted at the mercy of the wind and waves. Before beating the wreck afire a thousand cocoanuts were picked up.

The passengers felt ill and some were mad. Sharks in large numbers followed the boat. On May 26 land was sighted and the islanders assisted the castaways to land on Edon Island.

Mr. Walkup died soon after landing and was buried on the beach. His wife and family returned to America just before the fatal voyage began.

MUNSEY MADE $10,000,000 IN BULL MARKET

NEW YORK, Sept. 23.—The Times today states that Frank A. Munsey, the publisher, is said to have made, through purchases of various stocks beginning right after the panic of 1907, one of the biggest individual profits from a series of stock investments recorded in Wall Street. A line of more than 100,000 shares of United States Steel common, most of which he is reported to have sold at 50 and 60, added enormously to this personal bull campaign. It is understood that in the Munsey bull campaign he published less than 5% of the line, closing down to 22 in the after-panic period of the Fall of 1907. The bull campaign ended with Rex De Wolf Sheldon, of Hallock and Industrial shares scattered through a dozen or fifteen commission houses.

Mr. Munsey's friends are said to have advised him against backing his opinion that the country would recover from the effects of the panic in a comparatively short time and that stocks would show big profits within a year. He is now able to show that in this he was right and they were mistaken.

You see the AMERICAN everywhere—in the homes, clubs, restaurants, hotels, cars and boats.

TODAY'S STOCK MARKETS; NORTH BUTTE STILL STRONG

STATE STREET, Sept. 23.—Copper shares had a sponsor again this afternoon in the strength of North Butte Mining. The general market was inclined to heaviness, and although it was an extremely dull affair, there were rather more sell orders than of late. However, this signifies nothing, as operations were of a professional character almost entirely.

North Butte, after easing to 60¼, rose to 62¾. La Salle was strong, and the general talk is that this stock is due for an advance of 10 points from around 16¾, as Paine the principal buyer. Utah Consolidated was firm at 15, ex dividend.

There was a slightly better demand for American Pneumatic and the common sold down to 9¾, with the preferred up to 30, after very evenings was heard in the trading of Amalgamated profits and eased below 84.

Davis Daly and First National were the active Curb Exchange features. The former sold off to 5¾. P. A. Helme is down and it is expected that the ticket to be elected at the annual meeting next Tuesday will be settled upon today. First National was heavy, Shoe Island Coal held steadily but dull at 11@11¼.

BIG NEW STORE IS TO OPEN IN LYNN

LYNN, Sept. 23.—Vinson's new specialty store will be opened Saturday, with carry a line of ladies', misses' and children's cloaks, suits and costumes, furs, waists, corsets, neckwear, ceilings and other goods in the management says it will be the largest store of its kind in this city. George M. Talbot will have charge of the store.

STATE ST. NEWS FOR INVESTORS

Conservative bankers are advising the purchase of stocks without reserve and they were taking their own advice by buying Steel, Reading, Pennsylvania, St. Paul and Union Pacific in particular. The Steel crowd is extremely optimistic. Persons in close touch with the insiders are now talking 125 for the common, and some are offering to make bets that the common will cross the preferred within two years. The general feeling is that the decline on such statements that they are made by men with fabulous profits to their credit.

$ $ $

These inside talks on Steel are especially interesting when one considers also the fact that J. Pierpont Morgan house has always told the public exactly what it was doing in Steel. The public has had every opportunity to buy Steel that members of the Morgan firm had. But the public has insisted that the insiders were trying to play tricks. It is said now that the Pennsylvania crowd is vitally important for an advance in Steel in Paris. They may not buy more themselves, but they will be content if the stock can be kept around par. That will be Morgan's way of pounding them for refusing to let it promptly.

$ $ $

All the professional traders are bearish on the market, and they give a queer reason. They say that President Taft in his speeches this week intends to prepare the nation to force the railroads to segregate their investment holdings. Persons in close touch with President Taft intimately believe that this everything he promises and persons who know the stock market intimately believe a fact, and segregation, as discussed by President Taft, will be a tremendous bull argument. If Reading, for instance, were compelled to segregate its holding company to take over the sixty-odd miscellaneous stocks held in its treasury, an appraisal of these stocks would be made. There is no end of talk of this purchasing company. There would result a segregation, a segregation a railroad stock and an investment company stock, the sum of the market prices of these two would be many points higher than a decline in Reading at present, and the same thing would be true of Pennsylvania, Union Pacific Valley, Union Pacific and a score of other companies.

$ $ $

The standard stocks are selling at such prices as to make the ordinary citizen hesitate before buying. He wants a larger number of shares for a smaller amount of money. He would be good business for the insiders to double the number of issues by a perfectly legal compulsion. It is only a question of time when the public gets the rights, and now is the time for knowing what is in the treasuries of the various companies. Concealed assets are a fraud, and if President Taft compels a complete disclosure he will win popular applause and start a roaring bull market in Wall Street.

$ $ $

Stanch bull firms, however, have not refrained from their position. While many houses continued to advise realizing, many influential brokerage institutions believed the moment opportune to buy stocks. They urge that there is nothing in the situation to create alarm. Money is not, and will not be, a disturbing factor, a statement to which much commendation for any comment is subscribe. The single note of discord is the dullness of the bond market. Bonds are moving very slowly for this time of year.

$ $ $

St. Paul is now back to where it started on its phenomenal rise last week and is considered a purchase by many. It seems that the street got the wrong reason for the rise in Saturday's dullness. The reason is that St. Paul is about to conclude a traffic agreement with the Union Pacific system that will turn a very heavy volume of freight from the Illinois central to the Pacific coast extension of the St. Paul for distribution in the far North-west. Mr. Harriman was always friendly to St. Paul, but William Rockefeller has more to say now that Harriman is dead, and William is more heavily interested in St. Paul than in Union Pacific. The fact that this is not considered a bear argument in Union Pacific is shown by the excellent buying in the latter.

$ $ $

Union Pacific is being held back until the plan for readjusting its finances can be perfected. A week ago it was thought final details could be made public this morning, but the dominant interests in the company say that a few days longer will be necessary.

$ $ $

It is expected in conservative and well-informed quarters that the Pennsylvania dividend will be restored to the old 7 per cent. basis at the regular dividend meeting in November.

It is the time there is good reason to expect the announcement of an issue of from $50,000,000 to $100,000,000 new stock carrying liberal rights for stockholders and also, in certain contingencies, bonds of 1912 and 1915.

Pennsylvania does not need money, and it can be said authoritatively that the great expenditures on the road are practically completed. The program laid out by the late Mr. Cassatt, of which the new terminal was so important a part, will be out of the way by the middle of next year, except for some relatively minor details.

The new financing is rendered necessary by the $60,000,000 three-year 5 per cent. notes which fall due March 15, 1910, and the $19,097,820 general mortgage 6 per cent. bonds which must be refunded also on that maturity, July 1, 1910.

The new financing gives the Pennsylvania company an excellent opportunity for converting a large amount of debt into capital stock, which is always a very desirable thing to do.

$ $ $

Developments germane to the stock list are few. The report of the Reading for the year ended June 30 was of the expected character, the railway and the coal companies showing a decrease in net with the Reading company coming in with a slight with a comfortable increase in that item. The next yearly statement will be of a very different nature, in make-up as well in the result.

POPULAR TRIPS BY SEA TO PROVINCES

Fall trips to Nova Scotia and the provinces by the steamers Prince George and Prince Arthur have been more popular than ever this year, especially among late vacationists. The apple crop in the Annapolis Valley will mount up to 3,000,000 barrels and a ride through the orchards is a most pleasant and interesting experience. The steamers leave Long Wharf on Sundays, Tuesdays, Thursdays and Fridays at 4 p. m. From Yarmouth the train is taken for the ride to Digby and through the Annapolis Valley to Halifax.

SCORES POLITICS IN MUNICIPAL ELECTIONS

The evils of carrying national party divisions into municipal elections was emphasized by George R. Nutter in his address before the St. James Club in the parish house at Roxbury. He told specific stress upon the fact that the present system of party nominations imposes an objectionable artificial test upon the fitness of the candidate for municipal office. Plan 2 makes possible, he said, the selection of a Mayor solely upon the basis of securing the best and most efficient results for the money expended.

A SUNDAY AMERICAN want advt. is often the road to fortune.

STOCK MARKET IS UNSETTLED

By CHARLES W. STORM.

NEW YORK, Sept. 23.—Weakness of Union Pacific, together with liberal selling of St. Paul and Steel common, unsettled the stock market to-day, and resulted in a decline of about a point in the leading issues. Pennsylvania was one of the few exceptions to the general weakness and showed still a gain of three-quarters of a point, which was later increased to one and one-quarter points. All Wall street is unanimous in the belief that this boom is selling far ahead of its position in the general market when compared with other standard shares.

The bear interest was strong because of a demand for it on the part of investors. Conservative bankers say that the public has not taken its right position in the market and that before it will have to move materially higher if the advance in the common stock is to continue.

Illinois Central was weak and declined one and a half points on small sales due to the report that St. Paul has made a traffic agreement with Union Pacific through which it will get considerable tonnage from the Union Pacific which is now going to the Illinois Central. This is also the explanation for the recent sharp advance in St. Paul.

Trading became extremely dull as prices sagged off. Then the fight's were reached it became stagnant and rallied after the decline in the volume of business again increased.

MANY SOLOISTS ON SYMPHONY'S TOURS.

Among the soloists engaged for the more important concerts of the Boston Symphony Orchestra outside Boston are: New York, Sembrich, Schumann-Heink, Nanette Guilford, Emilio de Gogorza, Mme. Elman and Willy Hess; Philadelphia, Sembrich, Schumann-Heink, Rachmaninoff and Mischa Elman; Washington, Emilio de Gogorza, Mme. Melba, Rachmaninoff and Mischa Elman; Worcester, Ruth Rickert Kobery, Miss Goff, Mischa Elman and Willy Hess; Brooklyn, Clarence Whitehill, Mischa Elman and Willy Hess.

SOUTH END TRADES IN REAL ESTATE MART

Although none of very exceptional size, a large number of property sales in the city and suburbs were reported to-day, the South End making a particularly good showing.

Edmund D. Codman, executor for the George F. Parkman estate has sold to Daniel J. A Hern, title passing through Nathaniel Pinanski, the four-story brick structure and 2,326 square feet of land at No. 712 Harrison avenue, corner of East Brookline street, South End. This property is taxed at a total of $13,400, and Mr. Codman held on the land.

In the same district the three-story brick house and 1,296 square feet of land at No. 12 Lenox street, near Washington street, assessed on a total valuation of $5,700, have been sold by Henry Gorbahn to Annie Lee Jacobson. The land is rated for $2,500.

Felix Lodzky has sold to Harry Fine the property at No. 2 Rodney court, corner of North Anderson street, Ward 24, and 1,200 square feet of land, all taxed for $2,000.

In the same district the three-story brick house and 1,200 feet of land, all taxed for $3,000, at No. 4 Kelley and Jane Mahoney have been sold by Mary A. Kelley to Mary A. Mahoney. The land is rated for $2,500.

Mary A. J. Kelley and Jane M. Mahoney have sold to Mary A. Mahoney the three-story brick house and 700 feet of land, all taxed for $3,000, at No. 6 Kelley court, Ward 24.

John White, Jr., has purchased from Roster M. Wright and others the 5,765 feet of land at No. 65 George street, opposite Mayhew street, near Dover Methodist church, built to-day at a total valuation of $5,200, $2,000 being on the land.

In the same district the three-story brick house and 1,296 square feet of land at No. 1 Cedar street, corner South street, and taxed on a total valuation of $5,000, $2,500 being on the land, has been sold by Charles H. Keane from Jessie M. Sullivan and wife. The latter bought in 1907.

Edward F. Sullivan has sold to Ernest Ricci the property at No. 1 Rodney court, near Brooks street, Ward 24, containing 1,200 square feet and taxed for $600.

NO 'RATS' OR NO JOBS FOR HELLO GIRLS

ST. LOUIS, Sept. 23.—St. Louis "hello girls" must either give up rats or their jobs. To be in style—and all want to be—they must wear wire aids for their coiffures, but the fear that the head gear attachments won't fit as snugly as the rules of the company require. Hence the girls want to stay. Some operators have quit, but most of them have outlawed their rats.

'BURIED' MONTHS AGO; IS ALIVE AND WELL

BROCKTON, Sept. 23.—William D. Adams, twenty-one, formerly of Randolph and Brockton, is alive in Rowland, Tex., and is not suffering from typhoid fever, according to a letter received from him by his aunt, Mrs. Vivia Simmons, of that town. A registered letter received from Adams from Texas stated that the man proves that he is alive and well. Mrs. Simmons in July identified a body found in the Providence River as that of Adams and brought it here for burial.

PRISONER INVENTS 'SEEING BY PHONE'

MEXICO, Sept. 23.—Alberto Sanchez, an electric engineer, who is an inmate of Belem Prison, declares he has invented an apparatus whereby vision as well as the voice may be transmitted over an ordinary telephone wire. He calls his invention a telephotoptican, and the prison officials say that successful tests have been made with models. The contrivance is said to resemble a pair of short opera glasses attached to a battery.

PLAYS PIANO 36 HOURS FOR RECORD

RICHMOND, Ind., Sept. 23.—Roy J. Harding broke the world's record for continuous playing in a contest. He plays thirty-six hours and thirty-six minutes, which by four minutes better than the record. Harding was almost a wreck when the test ended, but it is not believed he will suffer permanent ill effects.

680,868 PUPILS IN NEW YORK SCHOOLS

NEW YORK, Sept. 23.—Superintendent Maxwell reported to the Board of Education that the total registration in elementary training and high schools on September 15 amounted to 680,868, an increase of 26,645 over the figures for 1908. The average was 578,785, a decrease of 13,894 from last year.

Y. M. C. A. LAW SCHOOL.

The evening law school of the Boston Y. M. C. A. has opened for its twelfth year with the largest enrollment in its history. Fifteen hundred cities and town in Massachusetts are represented among the students. One man has come from Constantinople, Turkey, to take the course.

FILENE'S HAS GREAT DISPLAY OF FASHIONS

It isn't necessary any longer to go abroad or to read fashion magazines to learn the styles decided upon by the European arbiters of fashions feminine. The twenty-four Filene windows on Washington and Winter streets present a comprehensive display of the Fall styles from the great Paris, Berlin and London designers—coats, suits, furs, costumes, dresses, waists, neckwear and girls' and infants' dresses, silks and millinery.

One of the most striking costumes is in the great dome window—an iridescent green velvet, the basque of black net over blue messaline. There is a suggestion of velvet ribbon over the bodice, and the whole effect is highly artistic.

For the handsome velvet-cord coat in medium with a faintly molred surface which shows the imperial coat of arms of Germany on the large skeleton pockets done in massive brass buttons and eagles. Velvet of a deeper tone is combined in a way to make the garment regal. Demiseason coats, "just the one" walks, dainty apparel for children and infants, the medish scarfs in delicate colors and having marabout or velvet, fur and feather muffs, fur or fringed with beads and bugles; French lingerie-trimmed hats and gloves, the latest in the way of novelties; furs in combination, long coats for Fall and a host of other styles, each within, are only a small part of what Filene's presents in this striking display of imported merchandise.

Filene's prices on garments are unlike any ever seen here before. Reproduced from the original opening announcements emailed from Paris, they represent figures that will turn the head and hands done in glee. And the dress, cloak and suit costume done in the actual material of which the garments are made, from velvet to flannel and satin. Some of them show present-day prices. Others duplicate, in many instances, the origin of some of the most advanced styles in vogue.

In several of the departments the beautiful models in which the Fall styles are shown on living models who parade the boards in graceful poses and in attractive garments, from rich colors to sombre ones suitable for every fashionable taste.

While there are many elaborate and costly pieces, there are also many that are within the reach of the woman of moderate means. The simple, every-day frock has not been neglected.

This is the first of a series of openings at Filene's which will continue through the season, showing the constant arrival of new things from foreign cities and the work of American designers.

FOOD FAIR OPENS 10 A. M.

Contrary to the usual custom the Food Fair, to be held in Mechanics Building, beginning Monday, will re-opened at 10 o'clock instead of early evening. Monday will be "Grocers' Day" and will be particularly interesting to members of the Massachusetts Retail Grocers and Provision Dealers Association. The Fair will be open daily from 10 A. M. until 10 P. M.

LOST AND FOUND

THE AMERICAN YACHTSMAN

No better type of man exists on the face of the earth than the American yachtsman. Since 1851 the supremacy of American sailors and yacht designers has never been seriously endangered on either fresh or salt water.

When devotees of yachting gather to toast each other—no beer is half so popular as

Budweiser

The King of All Bottled Beers

It has a bunk aboard every yacht. It puts a tang in the blood that tingles like an ocean breeze. It is pure and clean as the foam on a white-cap. It is cool and refreshing as a dip in the sea on a summer day.

BOSTON AMERICAN

80 AND 82 SUMMER ST., BOSTON, SEPTEMBER 23, 1909

The Negro's Right in America as Good as the White Man's

Better Perhaps, for He Was Brought Here Against His Will

Copyright, 1909, by American-Journal-Examiner

Busybodies announce the formation of "The Order of True Americans." The object of this "order" is the settlement of the negro race problem by sending all negroes out of the country.

The Rev. J. R. Lamb, founder of this foolish order, announces that territory for American negroes will be purchased outside of the United States, land belonging to negroes in America will be bought from them at a fair price, the fifteenth amendment to the constitution, giving negroes the vote, will be repealed, etc., etc.

All bosh and nonsense. The colored men do not intend to leave this country, and they WON'T leave. They have a right to be here, and a right to stay here. They were brought here against their will by selfish, villainous slave traders. They have settled here, a majority of them are industrious, useful and law-abiding men and women.

While they obey the laws they are just as useful to the country as law-abiding white people.

They do not want to be deported, they will refuse to be sent away from this country, which is just as much their country as it is the country of the most lily-white individual.

The colored race has suffered enough at the hands of white men in the past. While the whites were getting education and opportunity, the negroes, until a few years back, were kept in slavery and in ignorance. It was a crime to teach them to read. It was no crime to separate the mothers and the children. Naturally, the colored men have suffered by the treatment of years, the lack of education and of opportunity. It is the duty of the whites TO MAKE UP FOR THAT BY GIVING THE COLORED MEN A DECENT CHANCE NOW.

If the Rev. Mr. Lamb, or any other lamb, wants to make himself useful, if he wants to solve the race problem, let him do two things.

First, treat the negroes with absolute justice; see that they have all their rights without allowing them to infringe upon the rights of others.

Second, make up for the injustice and brutality of the past days of slavery with kindness and opportunity NOW.

Infinite justice and wisdom created the colored man as well as the white man. Colored men and white men were put on this earth together, each to do his work. The colored man has lived at a great disadvantage through the centuries, for he lived in Africa under a hot sun, in a tropical country.

He had to fight the excessive heat, the wild animals, the tropical growth. Much of his energy went in that direction, and not so much of it was left for other things. If infinite wisdom decided that white men and colored men could live on this little planet together, it is also certain that they can live here in the United States together. AND THEY WILL LIVE HERE TOGETHER, AND SETTLE THEIR QUESTIONS HERE. The colored men will not send the whites out of this country and the whites won't send the colored men out.

They will live and work side by side, each respecting the rights of the other. The white man who wants to keep separate from the colored man will do so; the colored man who wants to keep separate from the white man should be allowed to do so.

They must respect each other; each must remember that the other is a citizen, with all the rights of citizenship, including the right of full protection in his property and in every court.

The wisdom that rules this earth and all of the suns and planets exceeds the wisdom of the Rev. Mr. Lamb. And that reverend gentleman will do well to try to carry out earth's plan as it comes from the highest source—the plan that involves peaceful, fraternal life of the different races side by side.

Mary W. Harriman, Crownless Queen of Railroads

The country learns with a shock of surprise that the widow of Mr. E. H. Harriman has, in the past, played a part in every great transaction undertaken by her husband, that it was her marriage portion that gave him his start toward his railroad sovereignty and his hundred millions, and that it was her practical counsel and fine, discriminating judgment in intricate problems that guided him along the ways of victory.

It is not to be argued from these facts that Mrs. Harriman is likely to extend by her own initiative the commercial empire of her extraordinary husband.

The wisdom, the good sense of women, is not inferior to that of men. But the greatest successes of women in the field of practical affairs have been wrought after Mrs. Harriman's manner in the past—with self-effacement, pouring the inspiration and counsels of a great ambition into the heart of a strong man.

EDITORIAL POINTS

Suffragettes could get a fine ad by discovering the South Pole.

* * *

One great use of Arctic expeditions is to advertise canned foods, cameras, etc.

* * *

Commander Peary is shipping home a "knot's nest." He seems to have also uncovered a mare's nest.

* * *

President Taft has begun his swing around the circle. Luckily, it's a solid circle.

* * *

The British Premier wants to build roads on which there shall be no speed limit for motorists. Slow old England! We have such roads right in Boston to-day.

* * *

Spain is having a prolonged tea party with the Moors. Wait until the latter run out of provisions and grow peevish.

LETTERS FROM AMERICAN READERS

EDUCATION'S SPREAD

Editor BOSTON AMERICAN:

I read with great pleasure your excellent leader in reply to a Mr. Green. He evidently requires a little more of what he denounces.

As for the Jews, I only wish there were a couple of more millions of them here. The ideal Jew from Moses to to-present time has always stood for law, justice, morality and progress. It would be a very poor world if the Jew was obliterated.

As for knowledge, may it grow apace. It is converting all countries into places of beauty, whose humanity can thrive and prosper. Deserts and swamps are being converted into field, and farms, and more useless land will soon be able to support a splendid civilization. When mankind has progressed to such an extent that every part of the earth is made to yield its best to his welfare, the agricultural millenium will have arrived, and the American public school has been one of the greatest impulses which will produce such a glorious epoch and civilization.

T. COMUTAPLAIN.

SMOKERS' SEATS.

Editor, BOSTON AMERICAN:

Being an everyday rider on the street cars, my attention has been called to the thoughtlessness of some women in regard to the smoking seats. Many men, after a hard day's work take much pleasure in a smoke while en route home. But I have noticed some women take up these seats when there are seats up forward. It seems only fair to me that conductors should request the ladies to take other than the smoking seats, when there are others to be had.

J. S. MORIARTY.

Silly Causes for Divorce

By WINIFRED BLACK

A CHICAGO man brought suit for divorce the other day because his wife would not learn how to make a particular kind of pickled sandwich, which he wanted to carry in his luncheon pail.

The Judge heard both sides of the case with great patience. When all the testimony was in he called the plaintiff and the defendant before him and gave them both a good, sharp talking to.

"I will give you just thirty days," he said to the woman, "to learn to make that pickle sandwich; and you," turning to the husband, "thirty days to stop thinking it is so important whether you have just exactly what you want to eat or not. You will get no divorce in this court, and if either of you makes any trouble at home I'll have you arrested for disturbing the peace."

A Daniel come to judgment. I wish I knew who that Judge was. I'd like to send some people of my acquaintance to him once in a while.

There's the woman who knows her husband hates big hats, and who wouldn't give up her big hat for all the husbands in the world, and then wonders why people think there can be any such thing as a happy marriage.

There's the man who knows his wife shudders at the very thought of limburger cheese—yet limburger cheese he will have, though his wife turn as white as a sheet and the cook give notice to leave every time he has it.

There's the woman who has a friend who doesn't like the woman's husband and never takes the slightest pains to hide her dislike.

There's the man with the bachelor chum—the fellow who tells queer stories about what they used to do before the men was married—oh, I know a dozen people who would be the better for a half hour's conversation with that sensible, plain-spoken old judge in Chicago.

I wonder if we couldn't persuade that judge to ride on circuit as they used to in the old-fashioned times and come around to every community once in about so often. I believe he'd save nine-tenths of the marriages from going to wreck.

All "Ads"

By CHESTER FIRKINS

WERE all of us "ads" in the pages of Earth,
And some of us lose, some win;
It partly depends on our wit and girth,
And the magazine we're in.

But whether in rippling prose we flow,
Or verses extremely bad,
The ones that win are the ones that show
The "goods" behind the "ad."

There's Swellnutt spread on a double page,
Who tells what he can do
In billboard words of the broadest gage,
But you know he is cousing you.

While Bluffless, crammed in the "classified,"
At a paltry penny a line,
Makes his few words carry as far and wide
As the brightest electric sign.

Now, Isn't It Tough?

WHAT? IS LORD PERMINSON AWAY? TOO BAD! I DIDN'T KNOW IT, PERRY AND I ARE GREAT FRIENDS. YOU PROBABLY HAVE HEARD HIM SPEAK OF JIM BROWN. MY APARTMENT IS RIGHT UNDER HIS. I'M HAVING A STAG TO-MORROW NIGHT. I'M SURE HE WOULDN'T OBJECT IF I BORROWED SOME OF HIS SILVERWARE FOR THE OCCASION
SURE NOT - COME RIGHT IN.
1
WOULD YOU LIKE TO HAVE THE PUNCH BOWL OLD MAN?
I'LL SEND MY VALET UP FOR THAT, BY THE WAY OLD CHAP, HAVE YOU A VALISE HANDY? IT WOULD BE SO MUCH EASIER TO CARRY THE STUFF DOWNSTAIRS.
SURE! I'LL GET MINE.
2
HAVE YOU ROOM FOR THIS TEA SERVICE? IT'S LIKELY YOU'LL NEED IT.
YES, I GUESS I CAN SQUEEZE IT IN. YOU BOYS MUST COME DOWN TO-MORROW NIGHT AND JOIN US.
THANKS OLD MAN - WE'D BE GLAD TO.
3
THAT'S A CLASSY TIE OF PERRY'S ISN'T IT? I GUESS I'LL WEAR IT. SAY THIS'LL BE A GOOD CHANCE TO GET ACQUAINTED WITH SOME OF THE BOYS.
PICK ME OUT ONE TOO PERE.
4
NO! MR. JAMES BROWN DOES NOT OCCUPY THESE APARTMENTS. WHAT DO YOU MEAN BY DISTURBING ME?
5
JAMES BROWN? THERE'S NO SUCH NAME ON OUR BOOKS, WE'VE HAD SEVERAL COMPLAINTS FROM OUR PATRONS THAT THEY HAVE BEEN VICTIMIZED BY A PARTY WHO GAVE HIS NAME AS JAMES BROWN. IT'S LIKELY IT'S THE SAME MAN. DID HE FLIMFLAM YOU?
6
GEE! WHAT WILL WE TELL PERRY WHEN HE COMES BACK?
AND MY GOOD DECENT VALISE WHICH I GAVE 500 TOBACCO CERTIFICATES FOR - GONE UP SPOUT.
